Japanese Garden Treasures

[*Lilium concolor*]

K. Wada,
Hakoneya Nurseries,
Numazu-shi, Japan.

Telephone: Numazu 664 & 152.
Cable Address: Hakoneya, Numazu.

SPECIAL NOTES

All orders are subject to the condition of crops.

As I take the great care in selecting only the best of stocks and exercise the most delicate and judicious attention in packing in most suitable materials with a most satisfactory degree of moisture, varying according to the requirement of each kind, the distance of destination and the time of shipping, which I have learned from my past very long experience, to ensure best results at consignees' ends, each consignment is prepared to the best of my personal ability thus, I cannot accept any responsibility for the condition in which the goods may arrive. My responsibility ceases when goods are placed aboard steamers. Fortunately I have been very successful in transporting bulbs, plants and shrubs to all parts of the world and many testimonies will be open to you on desire.

Prices are calculated in English Shillings and are quoted free Numazu, package, freight, cost of certificate, etc. to be charged extra at cost price. All quotations might be subject to variations without notice if I should be compelled to do so in the event of unforeseen circumstances arising but such cases would be extremely rare. These prices cancel those in previous lists.

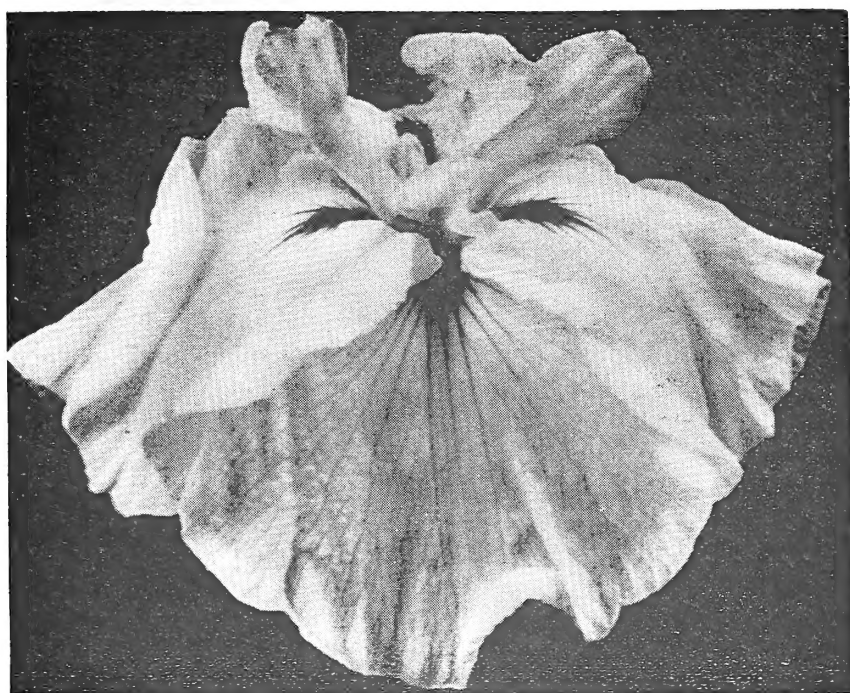

Payments. Customers are respectfully requested to make all remittances by **CHEQUE** or **DRAFT**. I do not prefer payment by Postal Money Order because of its unfavourable exchanging rate. Orders from unknown correspondents must be accompanied by **REMITTANCE, BANKERS' REFERENCE** or **OTHER SATISFACTORY ONES**, to ensure prompt execution.

Time for ordering. Orders for plants should reach me better between August and November or with some exceptions by January according to varieties. The earlier the better of the rarer varieties, so that you may have less chance of being disappointed on account of being sold out.

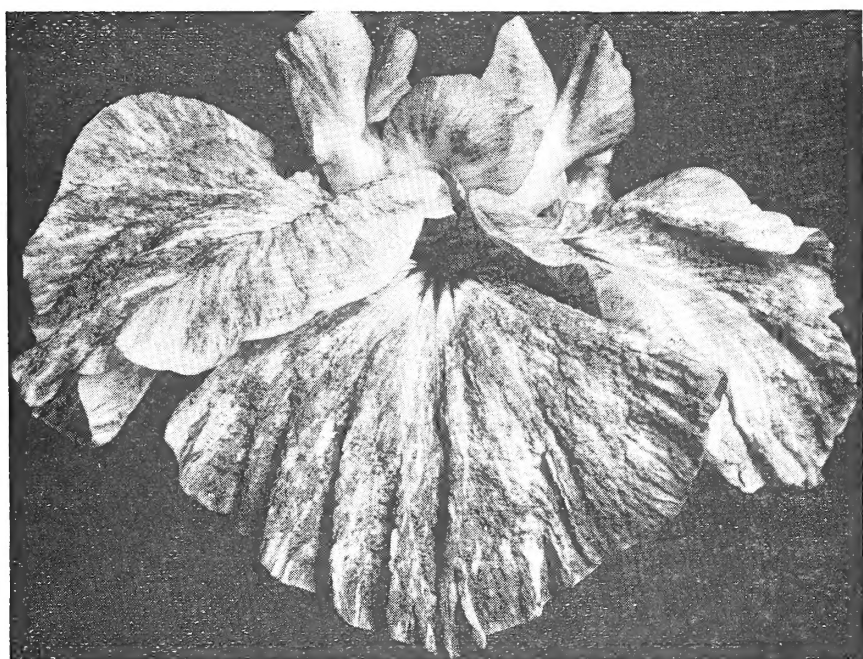

Non-Warranty. All my bulbs and plants are grown under the best possible conditions, and to the best of my belief are sent out in perfect condition. I therefore give no warranty expressed or implied, as to descriptions, quality, productiveness, or any other matters in connection with the success of the bulbs or plants sold by me, and will not be held liable in any way in cases of failure. In the unlikely event of bulbs or plants sent out by me being untrue to name I shall be willing to replace them or to make necessary adjustments in prices.

Prices are quoted in English Shillings. Not less than 10 plants of one variety are supplied at the 10 rate, 50 at the hundred rate, and 500 at the thousand rate and 5.000 at the ten thousand rate.

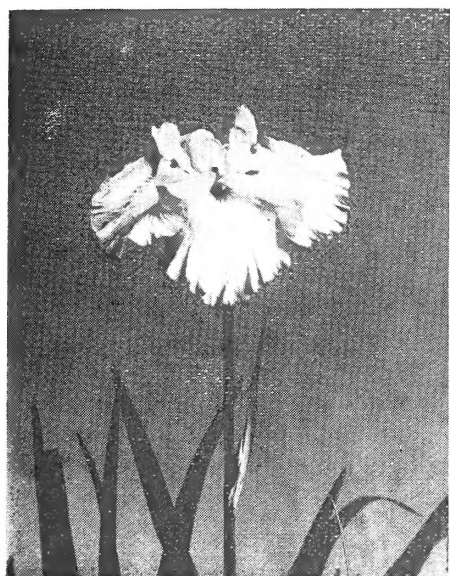

As prices have been brought to the lowest possible level consistent with first class quality, I am unable to allow any discount or deductions. If, however, smaller plants are required I may make necessary deductions. All orders receive my personal cares, especially in packing.

Imperial Paeony Hi-no-kanoko

Imperial Paeony Bikan

[See my Paeony catalogue and also page 13]

PAEONIA MOUTAN

(TREE PEONY)

All the following prices are for 2 year old grafts with 2 or 3 flower-buds, unless otherwise described. In my opinion 2 year old grafts are the smallest possible size to get immediate display and to secure earliest establishment at your end. One year old grafts, however, can be supplied at decreased prices by 30% from those of 2 year old grafts and should be better treated by bud-picking on arrival. At increased prices by 30% from those of 2 year old grafts, 3 or 4 year old grafts with 3 or 5 flower-buds can also be supplied. Fine specimen plants profusely budded can be offered at moderate prices and enquiries are much solicited.

Names in brackets are my English translation of the corresponding Japanese.

THE NEWER EXCELLENT WHITE VARIETIES.

each

- OTOME-NO-MAI** (*Dance of Girl*), enormous clear white full double flowers with purplish red blotches at the base, petals of thick texture, a late bloomer.....4/6

YOBOKU , mauvish rose full double flowers large in size.....	2/6
MEIJI-NO-HOMARE , large lavender tinted pink flowers, full double	2/6
YOROHNISHIKI , bright scarlet full double flowers	2/6

WINTER-FLOWERING VARIETIES.

I do not mean by this word, winter-flowering, 'flowering in winter only and not in the usual season in spring, that is, *Paeonia moutan praecox*.' Tree Peony under this category has a peculiarity to shoot at odd times and to flower from November to February. Therefore, they might be more correctly named as "*Paeonia moutan semperflorens*". Best results, however, can be obtained by artificial cares—pick away flower-buds as soon as they are seen in spring when bursting and prevent from flowering in spring and make them keep full energy for autumn shooting and cut away early in September all leaves from stems to stimulate to shoot in autumn to flower in winter and place them in a frost sheltered place when frosts come. It is very easy indeed to have them in flower in winter by the above mentioned procedure if the plants so treated are strong 4 or more year old plants. Plants of various ages are, therefore, offered here for customers' convenience to make them a judicious and proper choice. And please note the lowest figures are of 2 year old grafts.

KASUGAYAMA, enormous full double flowers waved and undulated, beautiful pink deeper at the base, very easy to flower in winter	each from 2/- to 10/-
KINSHOKO, large bright red flowers, double.....	each from 1/6 to 7/-

CHIVONISHIKI, bright red scarlet flowers with white stripes at the edge, double, very floriferous.....	each from 1/- to 5/-
KINO, intense fiery crimson scarlet, blackish at the base, 3 or 4 layers of petals	each from 1/- to 5/-

OLD VARIETIES OF A PROVED MERIT.

The following named varieties can be offered at
 -/7 each with one or two flower-buds and
 1/3 each with two or three flower-buds and
 2/2 each with four or six flower-buds, the first being one year old plants, the second 2 or 3 years old and the third 3 or 5 years old. Specimen plants with several flower-buds can also be supplied at reasonable prices and enquiries are much solicited.

WHITE: —

- HAKUGAN, white with a pall pink base, full double, large.
 SHIROZURU, pure white, large, 3 layers of petals.
 KANJORAKU, pure white, pink at the base, double, large.
 HAKUO-JISHI, pure white, full double, large, very floriferous.
 GABISAN, snow white, double, large.
 SETSUGEKKA, glistening pure white, double, large.
 ITTENGAKU, pure white, double, very large.
 SUISHOHAKU, pure white, of immense size, petals in 2 or 3 layers, very good for forcing.
 OKINA-JISHI, spotless pure white, double with many wavily cut petals, of immense size.

PINK.

- AYAGOROMO**, pink with a red base, large undulated wavy petals, full double, very large.
- BENI-CHIDORI**, beautiful pink with a bright red base, full double, very large.
- OHGOSHO**, rose pink, large, 2 or 3 layers of petals.
- HOHKAN**, full double, undulated wavy petals, pale salmon pink slightly striped with red.
- TATTAGAWA**, enormous semi-double flowers, pale shell pink deepening towards the base.
- SAHOHIME**, lavender pink with a deeper coloured base, full double, very large.
- GOSHOZAKURA**, pale shell pink, very fine, immense, well refined flowers attaining to over 1 foot in diameter.
- NIPPON-ZAKURA**, pale pink, a deeper shade at the base, double, very large, globular-shaped.
- SHIHOH-ZAKURA**, pale shell pink, enormous, globular shaped, full double.
- DOHUN**, very fine peach-pink, semi-double, very large, very good.
- KO-ZAKURA**, very fine shell pink, full double, globular-shaped, very charming.
- VOIGAWO**, flowers beautiful pink deeper at the base, full double and large, very fine.
- CHORAKU**, pale pink, mauve at the base, full double, very immense.
- SAKURA-JISHI**, flowers rose pink, turning deeper as flowers age, full double, with ragged petals, very large.
- USUGESHO**, flowers pale pink deepening towards the base, full double globular-shaped.
- YACHIYO-ZURU**, beautiful salmon pink narrow petals, full double, very good for forcing, very floriferous.
- YAE-ZAKURA**, flowers large, bright shell pink. Very good for forcing.
- TAMA-FUYO**, flowers globular shaped, salmon pink, very large. An early bloomer, very good for forcing.
- KASUGANO**, flowers medium sized, full double and salmon pink.
- KASUMIGASEKI**, pale shell pink deepening towards the base, double.

CRIMSON, SCARLET & ROSE.

- HIGURE**, bright scarlet crimson, double, very large, very good for forcing.
- ASAHI-NO-HIKARI**, bright red striped with intense crimson, double.
- HINOMARU**, enormous globular shaped flowers with 5 or 6 layers of petals intense crimson scarlet.
- KOUJO**, maroonish bright red, double.
- NOKAGURA**, enormous intense scarlet flowers with many ragged wavy cut petals, full double.
- HIOTOSHI**, flowers bright red with 4 or 5 layers of petals. Very floriferous, very excellent for cutting.
- KASANE-JISHI**, intense maroonish crimson, 3 or 4 layers of petals.
- YUYO**, bright fiery intense scarlet, large, full double.
- SHIN-KIKUBOTAN**, glistening scarlet chrysanthemum-like flowers, full double, globular shaped.
- SHINABOMIYA**, enormous intense crimson full double flowers.
- OUCHIHIME**, intense fiery crimson scarlet, double, very floriferous, very good for pot-culture. An early bloomer.
- SHOGUN**, intense crimson, full double, many petaloids.
- KAGURA-JISHI**, bright rose deepening to an intense crimson as flowers age, enormous, full double.
- YUWATOKAGAMI**, bright red deepening as flowers age, full double, enormous, many petaloids.
- TSUKASA-BOTAN**, globular shaped double flowers, bright red deepening to an intense crimson scarlet as flowers age.
- HI-NO-HAKAMA**, intense fiery crimson, 2 or 3 layers of petals.
- ASAHI-JURU**, bright intense scarlet, full double, large, very good for forcing.
- HATSU-HINODE**, bright red deepening as flowers age, full double, large.
- TAIHEI-KE**, bright red globular shaped large flowers with 3 layers of petals.

OHKAGURA, bright scarlet rose, very large, full double.

ABOMIYA, enormous globular shaped scarlet with thick massive petals.

SHIN-KUMAGAI, mauvish red, deeper at the base, double, big.

MAIHIME, beautiful salmon red, deeper at the base, full double, large.

AKASHI-JISHI, enormous scarlet flowers deeper at the base, globular-shaped, full double, with many narrow ragged undulated petals.

KUMAGAI, scarlet with a lavender tint, deeper at the base, double, very large.

HANA-NO-YAMA, scarlet full double flowers, well shaped. A nice neat grower, very good for pot-culture.

TANIMA-NO-YUKI, scarlet double, very good for forcing.

KIRIN-TSUKASA, enormous full double flowers good scarlet, bright crimson at the base.

BENI-TSUKASA, rose with a deep shade at the base, double.

ASAHI-NO-SORA, lavender tinted rose with a deeper shade at the base.

UKI-JISHI, beautiful salmon red large flowers with 2 or 3 layers of petals.

NIPPON-KO, large semi-double flowers mauvish rose paling to white towards the edge.

PURPLE & BLACK.

HANADAIJIN, pure intense purple, full double, large, very good for forcing.

SHIGYOKU, bright intense purple, double, globular-shaped.

TONNYO-NO-MAI, mauve, striped with white at the margin, large, double.

SHINYASEI, beautiful purple white-striped at the edge, semi-double.

IROJIMAN, intense purple large flowers with 2 or 3 layers of petals.

KONRON-JISHI, glistening black purple, full double.

SHIUN, mauve semi-double flowers attaining to over 1 foot across.

WHITE WITH COLOURED BASE.

OGONZOME, creamy white with a rose base, 3 layers of petals.

YUKIDORO, snow white with a red base, double, large.

SHIROKAGURA, creamy white with a pink base, full double.

YASOOKINA, white double flowers attaining to one foot in diameter pink at the base.

TVMAARARE, globular shaped double flowers, white with a rose base.

TAMAMATSU-ZURU, white, red at the base, 3 or 4 layers of petals.

AKASHI-GATA, white double flowers mauve at the base.

CHIYO-NO-TOMO, creamy white full double flowers, shell pink towards the base, large.

KOMACHI-SHIRO, paling pink with a red base, double.

FUROHMON, enormous semi-double flowers, white with a pink base.

STRIPED.

NISHIKI-NO-MINE, bright mauvish red with white striped at the edge.

BAKAN-NISHIKI, bright red flowers with 3 layers of petals, striped with white at the edge, large, very good for forcing.

KAMATA-NISHIKI, beautiful purple with clear white striped at the edge.

HINODE-GUMO, intense purple with distinct white stripes at the edge, full double.

NISHIKI-NO-SUSO, bright red with white stripes at the edge, double.

ORIHIME, glistening bright fiery scarlet with white stripes at the edge, very double.

HIRUTE-NISHIKI, bright crimson scarlet with white stripes at the edge, 2 or 3 layers of petals.

- SUMINAGASHI**, black purple with pure white stripes, very fine.
MIYAKO-NO-NISHIKI, white-striped intense bright crimson scarlet,
 3 or 4 layers of petals.
KOGANE-NISHIKI, bright crimson with white stripes at the edge,
 double.
TEIKIN, bright glistening intense crimson striped with a white
 at the edge, double, very fine.

I grow many other varieties but they are omitted here simply because they have some minor differences from those inserted here that their aesthetic value is quite same. But to those who are interested in, I shall be pleased to give full details of them.

PAEONIA ALBIFLORA

(HERBACEOUS PEONY)

WADA'S IMPERIAL PEONY

I am now very pleased to be able to offer this season few plants of this type of Japanese herbaceous peonies. The peonies in this category possess a very different style of beauty from any foreign and Japanese varieties hitherto appeared on the market. They have been since old times cultivated by a private garden for generations and have been gradually evolved to this perfection and hitherto have been prevented from going out of his garden as his own valuable asset.

They have 10 to 15 guard petals of varying colour and size and shape, beautifully arranged, forming in some an enormous saucer and in others a huge goblet, filled with great many curved petaloid anthers of a glistening golden yellow arranged in a shapely order and lying in massive tightly-packed globular formation and showing its golden brilliancy outside in a perfect degree. The centre golden glory, for which size, form and showiness this type is unique and has been well deservedly given a distinction, contrasts very nicely the guard petals' decoration and enhances the beauty of the latter. In some the filaments are tinted with red or some other colours at the base. These features are characteristics of peonies of this type, as well as many, especially paler varieties, being not less than 11 inches across and the richness of colour, some approaching to the deepest fiery crimson.

The stock of these plants are still very limited indeed and larger orders will not be fulfilled possibly. It is respectfully requested to give a few extra names for substitutes, as it is most likely that there will be some varieties exhausted soon.

Please note these peonies are not of my own raising and the word, Wada's, is only prefixed for the purpose to separate from any other "Imperial Peonies".

It is my greatest regret that notwithstanding my effort to select for the in ertion in my catalogue the best and most characteristic varieties only, following the raiser's instructions, as the raiser has some 500 varieties in his list, the following short descriptions seem to sound many are similar. Though it is granted the construction of flower of this type of peonies may be rather simpler to compare with double varieties, the more any slight change in the size, shape and colour of flower and petal and petaloid anthers affects the beauty of a whole flower. As it is practically impossible to describe a different beauty of each variety even in lengthy words unless actual flowers are shown, I have done here with only a few words.

Anyhow, I am sure it will be soon recognized all over the world that this type of peonies is unique in aristocratic beauty and gracefulness.

The following prices are given in accordance with the merits they have but not rarity, scarcity or newness. And it can be taken the higher the price the more fascinating.

each

FUJI-NO-TAKANE. The finest and most typical variety yet raised. The flowers are of the greatest size, anemone-like in shape, pure glittering white. The petaloid anthers are arranged in a beautiful shape and in a large form and golden yellow. A real gem.....	100/-
FUGAKU. Certainly the next best in this section. The flowers are abnormally enormous and anemone-like in shape with long pure white petals and have a large golden brilliancy at the centre which is very attractive.....	20/-
SHOSHUN. The flowers are very giant, saucer-shaped, pure silky white and have a large golden heart at the centre. The very best variety.....	10/-
FUGITAIKO. The flowers are very large, anemone-like with seven long petals, white tinged slightly with pink and have a large golden ball at the centre	10/-
KANPAKUDEN. Flowers very immense, anemone-like with long petals, white shaded shell pink slightly. A large golden heart at the centre	10/-
GESSEKAI. Flowers of immense size, anemone-like with large long guard petals, pale pink turning to pure white. A large golden heart at the centre.....	6/-
TEITO. Flowers very immense, anemone-like with long petals, pure pearl white. A large golden heart at the centre.....	6/-
JITSUGETSUSEI. Very large, saucer-shaped with large long petals, pure white, a very large golden glory at the centre ...	2/-
HITOHASHI. Large, widely cup-shaped with long petals, pure white, a very large golden glory at the centre.....	2/-
KONAN, Not very large, cup-shaped, pure white, a golden display at the centre.....	2/-
TSUMORUYUKI. Large, saucer-shaped with long petals, pure white, a golden ball at the centre.....	2/-
SUIKEI. Very large, anemone-like, pure-white, a golden ball at the centre.....	2/-
KANZAN. Large, cup-shaped with broad petals, snow white, a golden ball at the centre	1/6
SENJO. Very large, anemone-like, very pale pink turning to white a very large golden display at the centre.....	1/6
SAGA. Large, saucer-shaped with long petals, very pale pink, a medium golden ball at the centre	1/-
YUBIKAN. Large, cup-shaped with broad petals, very pale pink turning to snow white soon, a large golden glory at the centre.....	1/-
MANGETSU. Large, saucer-shaped, pure snow white, a golden heart at the centre.....	1/-
KORYUKAN. Large, saucer-shaped, pure snow white, a golden heart at the centre.....	1/-
ZUIHO. Large, cup-shaped with broad petals, pure white, a golden heart at the centre	-/6
SHIKYO. Large, anemone-like with long petals, snow white, a golden contrast at the centre	-/6

PINK:—

- MOMOYAMADEN.** Flowers enormous, very beautiful deep salmon paling at the base, widely cup-shaped with seven broad petals. Petaloids golden yellow, very attractively arranged in a large flat ball20/-
- SHUZAN-NO-BYO.** Flowers very immense, anemone-like with long broad petals. A large ball of golden yellow petaloids arranged shapely at the centre20/-
- SANCHO-NO-TSUKI.** Flowers very large, saucer-shaped with long petals with an attractive golden ball at the centre.....10/-
- RHIMYO-NO-KYOKU.** Flowers very enormous, saucer-shaped with long petals, salmon pink paling at the base. The golden hearts at the centre are medium-sized, globular-shaped and very attractive10/-
- TENCHI-NO-TODOROKI.** Flowers very immense, anemone-like with long petals, fine bright pink. A large golden brilliancy at the centre10/-
- WAKOZAKURA.** Flowers huge, anemone-like with long petals, delicate pink. A large golden glory at the centre.....10/-
- YUKI-NO-AKEBONO.** Flowers very large, saucer-shaped with long broad petals, deep clear pink. A medium-sized golden ball at the centre6/-
- YOSHINO-GASUMI.** Flowers very immense, saucer-shaped with long petals, fine pale mauvish pink. An attractive medium-sized ball at the centre.....6/-
- TANIMA-NO-HARU.** Flowers giant, saucer-shaped with long petals, fine soft pink paling towards the base. A medium attractive golden ball at the centre.....6/-
- AMANOKAGUYAMA.** Flowers very large, chalice-shaped with broad cherry-like petals, attractive deep pink paling towards the margin. A very large golden glory at the centre.....6/-
- SENYAICHIYA.** Flowers large chalice-shaped with broad cherry-like petals, deep mauve. A medium-sized golden ball at the centre.....6/-
- KUNKOKU.** Flowers enormous, widely cup-shaped with long petals, fine pale pink, A medium golden ball at the centre4/-
- GONGE.** Flowers very large, widely cup-shaped with large broad fringed petals, deep rose turning to paler as they age. Long golden petaloid anthers in a large form at the centre.....4/-
- GIONSHOJA.** Flowers immense, saucer-shaped with long petals, pale mauve. A large golden brilliancy at the centre.....4/-
- SAICHU-NO-TSUKI.** Flowers very large, anemone-like with long petals, fine mauve. A medium golden ball at the centre.....4/-
- TOEN-NO-ARASHI.** Flowers large, deep rose. A medium golden ball at the centre.....4/-
- KAJIN.** Flowers large, cup-shaped with thick broad petals, deep rose, white at the base. A medium-sized golden glory at the centre4/-
- MATSU-NO-MISAO.** Flowers immense, anemone-like with more petals, beautiful pale mauve. The centre golden glory is also large. A very attractive flower.....2/-
- TOGEN-NO-YUME.** Flowers large, saucer-shaped with seven cherry-like petals. A fine golden ball at the centre.....2/-
- KUMOI-NO-KOE.** Flowers large, anemone-like with long broad petals, deep warm pink. A medium sized golden ball at the centre.....2/-
- GISHI-OMOKAGA.** Flowers large, saucer-shaped, warm pink paling towards the edge. A medium-sized golden glory at the centre2/-
- YAYOI-NO-SONO.** Flowers large, saucer-shaped with long broad petals, fine mauve. A golden heart at the center.....1/6
- TAIKO-NO-CHO.** Flowers large, widely cup-shaped, deep mauve. A golden ball at the centre.....1/6
- TEN-NO-BIGYOKU.** Flowers immense, anemone-like with long petals, mauve turning to white as they age. A golden contrast at the centre.....1/6
- GOSAI-NO-TOKU.** Flowers giant, loosely chalice-shaped, very pale pink. A golden ball at the centre.....1/6
- SENKYUSAI.** Flowers large, salmon pink paling towards both

the edge and the base, cup-shaped. A golden glory at the centre.....	1/9
BANKA-NO-SHU. Flowers very immense, anemone-like, pale pink. The golden hearts at the centre are also attractive ...	1/6
TEN-NO-FUKUIN. Large, saucer-shaped, warm pink, a golden ball at the centre.....	1/-
MEIZAN-NO-YUKI. Very large, chalice-shaped with large broad petals, white, pink at the edge, a golden ball at the centre.....	1/-
SHINKI-NO-KOSHI. Very immense, cup-shaped, deep rose, a golden heart at the centre.....	1/-
IKUYO-NO-CHIKAI. Large, saucer-shaped with long cherry-like petals, pale pink paling at the base.....	1/-
GYOKUMO-NO-MAI. Large, chalice-shaped with broad petals, pale pink, a golden glory at the centre.....	1/-
TEIHI-NO-KAN. Large, anemone-like with long cherry-like petals, a medium golden heart at the centre.....	1/-
BISHI-NO-MISAO. Large, cup-shaped with broad petals, a medium golden brilliancy at the centre.....	1/-
SEIJIKO. Large, saucer-shaped, pale rose, deeper at the margin, a medium golden ball at the centre.....	1/-
SHIRAITO-NO-TAKI. Large, saucer-shaped, pink, a medium golden ball at the centre.....	-/6

RED : —

TAMA-NO-MIKOSHI. Flowers black crimson, huge, anemone-like. The centre heart is very large, tightly ball-shaped, brilliant golden yellow. The finest in this section.....	100/-
KUNKOKU. The flowers are large, cup-shaped with long rounded petals, bright fiery scarlet. The centre glory is large, flatly globular, brilliant golden yellow, a good contrast with the quard petals	20/-
TENON. The flowers are large, widely cup-shaped with long broad petals, blackish crimson. The typical centre glory is large, well shaped and attractively golden yellow.....	20/-
KOUN. Flowers large, intense purple crimson, fringed at the edge. This variety has more petals than others of this type which are arranged in a saucer-shape with a large golden ball at the centre.....	20/-
TENGAIBANRI. Flowers very enormous, anemone-like in a refined form, beautiful rose. The centre heart is very large, well-shaped, golden yellow. A dwarf grower, one of the best	20/-
SEIMYO. Flowers large, widely cup-shaped with long petals bright red. A beautiful golden ball at the centre.....	10/-
SENZAI. Flowers large, anemone-like, intense black crimson. A golden ball at the centre.....	10/-
KOKOKUKA. Flowers large, like those of Holly Lotus with long broad petals, deep blackish crimson. A large golden contrast at the centre.....	10/-
KENKOKUKINEN. Flowers very large, anemone-like, bright black red. A large golden glory at the centre.....	10/-
KOKUHOH. Flowers large, anemone-like with long petals, deep blackish crimson. A large golden heart at the centre.....	10/-
KINKI. Flowers bright fiery crimson, large, saucer-shaped with a little more petals. The golden glory at the centre is also very large and tinted at the base.....	10/-
HIME-NO-MATSU. Flowers very large, single-flowerins Dahlia-like in shape, bright crimson red. A large golden heart at the centre	10/-
KINTEI. Flowers large, anemone-like with long petals, bright black red. A large golden contrast at the centre.....	10/-
UTAOTOME. Flowers immense, anemone-like with long petals, red. A medium golden heart at the centre.....	6/-
MIKASA. Flowers very large, widely cup-shaped, glittering intense fiery crimson. A very large golden heart at the center tinged at the base.....	6/-
GANMOKO. Flowers large, saucer-shaped, fine red. A golden ball at the centre.....	6/-
ISHIN. Flowers very large, saucer-shaped with long rounded petals, bright dark crimson. A large golden ball at the centre.....	6/-

- SHIMPL.** Large, widely cup-shaped with long rounded petals, deep bright red. A large golden ball at the centre.....4/-
- SEIZAN.** Large, single-flowering Dahlia-like in shape, intense red. A medium golden heart at the centre.....4/-
- YUJO.** Large, widely chalice-shaped with rounded broad petals, intense black crimson. A large golden contrast at the centre.....4/-
- TENMEN.** Immense, chalice-shaped, bright fine red. A medium golden heart at the centre.....4/-
- SENJIN.** Large, widely chalice-shaped with broad massive petals, bright blackish red. A medium golden yellow ball at the centre.....4/-
- RANTO.** Very large, widely cup-shaped with broad petals, glistening bright crimson. A large golden ball at the centre2/-
- JUSAI.** Large, widely chalice-shaped with very attractive broad petals, intense fiery crimson. A medium golden ball at the centre.....2/-
- TEITO.** Large, anemone-like with long petals intense black red. A medium golden ball at the centre.....2/-
- DAIJO-NO-HI.** Large, anemone-like with long petals, clear red. A medium golden ball at the centre.....2/-
- NYORAI.** Large, widely cup-shaped, deep intense red. A medium golden ball at the centre.....2/-
- TEIKOKU.** Large, saucer-shaped, deep crimson. A medium golden heart at the centre.....2/-
- TAZU-NO-KOE.** Large, chalice-shaped with seven petals, intense black crimson. A medium golden glory at the centre.....2/-
- SHUKUTEN.** Large, anemone-shaped with seven petals, intense bright orange red. A medium golden ball at the centre ...2/-
- FUMONHIN.** Large, cup-shaped with broad rounded petals, bright red. A large golden ball at the centre.....1/6
- KYOGENKO.** Not very large, cup-shaped with rounded broad petals, intense black crimson. A medium golden ball at the centre.....1/6
- KOIHACHIGEN.** Large, cup-shaped with rounded broad petals, deep purple crimson. A medium golden ball at the centre1/6
- DAIJO-NO-HI.** Not very large, chalice-shaped with seven broad petals, deep red. A medium golden heart at the centre.....1/-
- SHIKISHIMA.** Large, saucer-shaped with rounded long petals. A large golden heart at the centre tinted at the base.....1/-
- AIKOKU.** Large, anemone-like, intense deep crimson red. A medium golden contrast at the centre.....1/-
- KOKUKASEN.** Large, anemone-like, intense orange red A medium golden glory at the centre.....1/-
- GINNAN.** Very large, cup-shaped with broad petals, clear deep red. A medium golden heart at the centre.....1/-
- SHINJU.** Large, anemone-like, deep bright red. A large golden yellow heart.....1/-
- CHIKURIN.** Large, saucer-shaped, clear deep crimson red. A golden heart at the centre.....1/-
- KINKA.** Large, widely cup-shaped, deep crimson. A golden heart at the centre tinged at the base.....-/6

IMPERIAL PAEONY

The peonies in this category have a distinctly different beauty from any foreign varieties. They compell the highest admiration of all who see them by their peculiar charm. Though all the other Japanese varieties are, more or less, similar to foreign varieties, this and the above both claim well marked distinctions in the history of herbaceous peony in the world.

Here I have only inserted a few best but to those interested I shall be pleased to submit a complete seperate list.

each

- IRIHI.** The flowers are of immense size, bright deep pleasing red, saucer-shaped with broad guard petals and filled to the brim with a great mass of beautifully arranged tufted upright narrow petaloids deep rose in colour edged with golden yellow, which gives a wonderfully brilliant effect. Unique in this section.....8/-
- MIHATA.** A really wonderful masterpiece. The flowers are enormous, brilliant intense red, widely chalice-shaped with huge waxy broad petals encircling the beautifully arranged mass of narrow petaloids bright red on one side, white on the reverse and edged with gold. A strong vigorous upright grower. A real gem.....6/-
- FUYAJO.** Brilliant velvety black red, widely cup-shaped with broad petals in 2 layers, a mass of narrow petaloids deep red edged with gold at the centre. Very choice.....1/6
- BIJIN.** Very beautiful pale rose, saucer-shaped with broad petals, immense, beautiful central golden petaloids.....1/6
- RORAKU.** Beautiful rose, saucer-shaped, large, beautiful rose central petaloids edged with golden yellow.....-/10
- TOUN.** Immense, saucer-shaped with broad petals, fine pale pink, at the centre a mass of narrow upright petaloids pink edged with gold.....-/10
- YASOOH.** Very large, creamy white, a mass of upright golden narrow petaloids at the centre.....-/10
- TAMAKYUDEN.** Very large, widely cup-shaped with broad petals, brilliant intense red, at the centre a mass of narrow petaloids rose edged with gold.....-/10
- KINSHICHO.** Very immense, beautiful rose, saucer-shaped, at the centre a mass of narrow petaloids rose edged with gold-/10
- MICHISHIBA.** Very large, clear red, saucer-shaped, a mass of narrow petaloids red edged with gold.....-/10

IRIS KAEMPFERI

As far as I know, Iris Kaempferi has been developed in Japan in three different places independently each other. It is only very recent that the strain which was developed at the most distant place from Tokyo has appeared on the market and is becoming widely known by its unsurpassing beauty. It has been evolved by a few private gardeners to this perfection and beauty. And it seemed that there were no intercourses between them as they were widely apart and lacked any communication facilities at all. Its having been prohibited to slip out of their possession as their own valuable assets accounts for that until very recently it had been a stranger to almost all of us.

It is so beautiful and fascinating that the other strains which were popular among our garden lovers are rapidly being dislodged and replaced by this strain. This strain is notable in having very large massive flowers of great substance with broad thick immense petals and in being very rich in colour. These features are characteristics of this strain, by which it surpasses far above the other strains and well deserves the merit it now receives. Really a great contribution to the horticultural world.

ICHIBOSENRI. Very huge, 3 immense massive petals of great substance, clear intense crimson paling to white at the base. One of the few best.....	4/-
SENJU-NO-KAGAYAKI. Very large, 6 large massive petals, white shading beautiful deep red at the edge. Very fine.....	4/-
TAKI-NO-KOROMO. Enormous, 3 large long broad petals, white shading deep red at the edge. Very choice.....	2/-
HANAZATO. Large, 6 large thick petals, blackish crimson with white lines in the middle.....	2/-
KOYO. Large, 6 petals, deep black red, very attractive.....	2/-
SANOUNBO. Very immense, 6 immense petals, deep crimson paling to white towards the base. A very fine variety.....	2/-
TOKIWA-NO-HANA. Very huge, 6 immense broad massive petals, very intense crimson with a russet hue, an early bloomer.....	2/-
FUSHA-NO-YUME. Large, 6 petals white with a narrow deep crimson edge	2/-
MAWA U-TSUKIMI. Large, 3 very broad petals, deep crimson edged white. Very good.....	1/-
FUMETSU. Large, 6 large thick petals, blackish deep crimson with narrow white lines.....	1/-
KISOOIWAKE. Large, 6 petals, deep crimson paling towards the large white base with white lines.....	1/-
MANZANSHIGURE. Large, 3 petals, pure white narrowly edged with deep crimson. An early bloomer.....	1/-
KINSEN-NO-SHIRABE. Large, 6 petals, deep russet.....	-/10
SHIGA-NO-MIYAKO. Large, 6 petals, white splashed with purplish red	-/10
HOREI. Large, 3 broad massive petals, very deep crimson with white lines	-/10
USUGESHO. Large, 6 petals, white striped profusely with red. An early bloomer.....	-/10
CHUSHU-NO-AKI. Large, 6 petals, very deep russet.....	-/6
KINSEI. Large, 3 petals, very intense crimson with white base and with white lines.....	-/6

WHITE: —

TAMA-NO-HANA. Enormous, massive broad petals six in number of great substance, pure snow white. The finest white.....	10/6
GAMOKAN. Enormous, massive broad six petals of the greatest substance, pendant, glistening pure white. A very noble grand flower.....	10/6
SATSUKIAMAGASA. Enormous, massive broad undulated six petals, pendant, clear snow white.....	6/-
FUKI-NO-HANA. A very noble flower with huge transparent white six petals.....	6/-
HANACHIRUNAMI. A very attractive variety with immense spotless white flowers six-petalled.....	6/-
KIKUNO-SHITATSUYU. Enormous, massive very thick 6 petals, pure white.....	6/-
TSUKI-NO-SHIROTAKE. Immense, massive broad 6 petals, pure glistening white.....	6/-
YAMABIKO. Of giant size, huge undulated 6 petals spotless pure white. The typical white variety.....	4/-
MAKIBA. Astoundingly large, immense 6 petals, pure glistening white. The most grand noble variety yet raised.....	4/-
KOTO-NO-SHIRABE. Very immense, massive broad roughly undulated 3 petals, very fine. The typical single white.....	2/-
NARUKODORI. One of the most largest flowers with 3 long broad enormous petals recurved at the edge upwards, snow white.....	2/-
SIMBU. Immense, 6 roughly undulated petals, spotless white.....	2/-
HANAGUMORI. Very large, 6 marvelously immense petals, snow white.....	2/-
SUICHO-NO-ATO. Very large, 6 snow white petals. One of the very best.....	2/-
CHITTOSENISHIKI. Large, 6 broad undulated petals, pure white.....	1/-
MAIKO-NO-HAMA. Large, 3 crystal white petals.....	1/-
SHIMPI. Large, 3 roughly undulated petals, snow white.....	-/10
HAGITSUYU. Large, 6 pure white petals.....	-/10

YAKUMODACHI	Large, 6 undulated white petals.....	each
MISONO-NO-MATSU.	Large, 3 rounded long petals.....	/10
KOJO.	Very immense, 6 enormous petals, pure white. One of the very best.....	/6

BLUE & PURPLE:—

MEISHO.	Large, 6 astoundingly thick petals, most attractive deep blue with a few white lines. The most striking variety.....	21/-
MUSHI-NO-KOE.	Large, 6 petals, blackest purple blue. The nearest approach to a black yet raised.....	10/6
UMIBE-NO-NAMI.	The finest single variety with thick broad immense undulated 3 petals, beautiful royal purple.....	10/6
YUBO-NO-KOE.	Very enormous 6 petals arranged shapely, intense velvety black purple turning to deep royal purple. King of the purples.....	10/6
SHIGYOKU.	Very huge 6 petals, intense gentian blue with white lines. One of the few best.....	10/6
MYOSETSU.	Very giant 6 petals, deep violet blue with a red sheen paling to the large white base with white lines. One of the typical varieties.....	10/6
AWAGI-NO-KAGE.	Large, 6 petals, most intense gentian blue. Of a majestic appearance.....	6/-
KYUDEN-NO-MAI.	Large, massive 6 petals, most sparkling vivid gentian blue. One of the very best.....	6/-
UKIYO-NO-UMI.	Large, substantial broad 6 petals, most intense black purple. Most striking variety.....	6/-
KOHI.	Large, 6 petals, deep brown purple with the suffusion of a deep russet colour. The most striking colour.....	6/-
KOKAN.	Large, 6 petals, white splashed with violet purple at the base forming a white edge. One of the most attractive varieties.....	6/-
HIME-NO-MIYA.	Large, true double with enlarged petaloids, massive broad petals, deep black purple.....	4/-
MUSUBUKAMI.	Very immense, 6 petals, most beautiful violet purple. One of the very best.....	4/-
YUEN.	Very enormous, 6 massive undulated petals, most attractive gentian blue.....	4/-
NEZAME.	Very huge, massive broad 6 petals of great substance, most intense blackish violet velvety purple.....	4/-
SHIKITEN.	Very giant, enormous massive 3 petals, deep shiny violet blue with a strong deep russet shading, paling to the white base with white lines.....	4/-
GYOKUTEL.	Large, 6 petals, most beautiful violet blue with narrow white lines.....	4/-
GYOKURO.	Immense 6 petals, pendant, pale azure blue with a white base.....	4/-
HAKUOHO.	Immense, massive six-petals, white profusely striped with pale azure blue towards the edge.....	4/-
MOMIJI-NO-TSUYU.	Of immense size, broad petals recurving upwards at the edge, glistening intense blue purple.....	2/-
FUKUJIN.	Very immense, intense violet purple.....	2/-
GEKAI.	Large, 6 large petals, intense gentian blue.....	2/-
KUNSHI.	Large, 6 pendant petals, intense vivid sapphire blue.....	2/-
YOHA-NO-HOTARU.	Large, 6 well spread petals, deep vivid royal purple.....	2/-
SHIRYOKU.	Large, vivid gentian blue, 6-petalled.....	2/-
KUNYO.	Large, long six petals, deep russet purple with narrow white lines.....	2/-
BUSHI.	Large, six-petalled, pale azure blue with a red sheen, white at the base.....	2/-
MURADORI.	Large, six-petalled, intense violet blue shading white towards the base with small white blotches.....	2/-
KINKI.	Very immense, six-petalled, pale violet shading white towards the base with narrow white lines.....	2/-
MAIHIME.	Large, three massive broad petals, pale azure blue shading white towards the base with white lines at the middle.....	2/-
TOSHUKU.	Large, pendant six petals, vivid violet blue with a white base and white broad lines.....	2/-
YAMAUDA.	Large, six petals, white profusely spotted with purple all over.....	2/-

- HAKURYU.** Large, 6-petalled, very attractive violet blue with white lines2/-
- KINKYOKU.** Very immense, massive broad six petals, pale lavender blue1/-
- ASHI-NO-TSUYU.** Very giant, massive broad 6 petals, deep purple with a red sheen1/-

IRIS KAEMPFERI OF THE OTHER STRAINS

These strains have been familiar to all of us and also to foreigners since long, as you are aware. But when they are compared with those of the above described recently introduced strain, I find that even the best varieties fall behind the latter for the lack of such size and grandeur of flower and such richness of colour and showiness. To say nice things the former has a primitive delicate beauty and therefore I offer here as collections, and for those interested I shall be pleased to send a complete list.

KOKURYU-NISHIKI, deep purple striped with red.....	1/-
MORINO-SHITA, large azure blue.....	1/6
NUREGARASU, deep violet red.....	1/6
semperflorens	-/6
SHIUNDAI, pale lavender, large.....	1/6
TSUDABENI, deep violet red.....	1/-
YUKIKAGAMI, snow white with pale purple base, large.....	1/6
YAGURUMA, six-petalled, pure white, very large.....	1/6
YUKIDORO, white with red base.....	1/-

A collection of 12 plants in 12 different varieties, my own selection 12/-

IRIS SANGUIUEA

(IRIS SIBIRICA ORIENTALIS)

A native species with flowers larger than Iris sibirica. The followings are notable varieties of it.

albiflora , white form	-/3
alba flora pleno , double. white with yellow base.....	1/-
nana alba , dwarf white	-/6
nana coerulea , sky blue.....	-/6
nana grandiflora , larger flows, very dwarf.....	1/-
nana grandiflora alba , larger white flowers, very dwarf.....	1/-
praecox , very early bloomer.....	1/-
rosea , very choice, pale rose.....	1/-
spontanea , type species.....	-/3

	<i>per 10</i>	<i>each</i>
Iris extremorientalis , a new native species with beautiful violet flowers.....	3/-	
Iris gracilipes , a well known tiny gem.....	4/-	-/6
Iris gracilipes alba	10/-	1/3
Iris japonica	2/-	-/4
Iris japonica folis-variegata	4/-	-/6
Iris koreana , one of the finest introductions from Korea. A tiny grower 3 to 4 inches high with beautiful purple flowers large for the size of plant in early spring.....	8/-	1/-
Iris monoforme , a very rare tiny species from Korea with large creamy yellow flowers.....	16/-	2/-
Iris lactea chinensis , chinese species with narrow wiry glaucous leaves, white flowers slightly veined and flushed with lavender.....	20/-	2/6
Iris minuta , another tiny gem with golden yellow flowers in early spring. Chinese species.....	8/-	1/-
Iris Rossii , dwarf gem, 4 to 5 inches high, purple.....	8/-	1/-
Iris ruthenica nana , another little treasure, 5 to 6 inches high with intense violet purple flowers in early spring.....	4/-	-/6
Iris setosa , broad foriage, several rich violet purple flowers upon stout leafy stems.....	12/-	1/6
Iris species korea , a new species related to <i>Iris koreana</i> , 4 to 5 inches high with lavender flowers in early spring ...	12/-	1/6
Iris tectorum , a chinese species with loose sprays of rich blue or white flowers.....	4/-	-/6
Belamcanda chinensis , a very showy stately iridaceae with large panicles of orange red purple-spotted flowers in August. Each flower is 3 inches across. Thrives well in any position and condition.....	2/-	-/4
Belamcanda chinensis curtata , a compact form of the above...5/-	5/-	-/8
Belamcanda chinensis flava , another compact form of the type with brownish yellow flowers spotted with purple.....	5/-	-/8
Belamcanda umbellata , a new species introduced by me and named by Mr. Grey. Very valuable for cutting in the hottest dry summer, for sunny droughty rockeries and gardens, though flourishes well also in shady wetty places. The flowers last very long in water. It grows up to a height of one foot and has a very compact appearance, having leaves similar to those of German Iris, and has at the height of heat in August large compact panicles of deep golden yellow flowers 3 inches across. It is very showy and I can not recommend too much.....	5/-	-/8

CHRYSANTHEMUM

There exist now some ten thousand named varieties of varied types of large autumn-flowering Chrysanthemum in Japan and on application either a nearly complete list or a very selected list will be furnished with pleasure. Here I offer as collections.

A collection comprising 10 best large autumn-flowering varieties of proved merit :—

A	3/-
B	5/-
C	7/-
D	10/-

CASCADE CHRYSANTHEMUM

(OVER HANGING SMALL
MULTI-FLOWERING VARIETIES)

At the present some hundred varieties of this small multi-flowering strain are grown in Japan. Varieties having the best habit for growing in the "Cascade Style" and best colours are, however, naturally limited and the following are my own confident selection comprising only the best proved varieties representing those raised in Japan.

FOR PLANTS OF LARGE SIZE

each 1/-

SAIKO, large, tubular florets, golden yellow tipped scarlet at the edge.

MOMIJI-NISHIKI, of medium size, flat florets, bright vermilion red.

YUWATO-KAGAMI, large tubular florets, deep brown yellow.

SEIJUDEN, large, tubular florets, deep brown red.

JUIKO, bright scarlet.

HOKUTOZA-SHIRO, large, white tubular florets.

KINSHI, large, golden brown.

ARASHIYAMA, large, pure crystal white.

YUGESHIKI, large, golden yellow.

GOSECHI-NO-MAI, large, bright red scarlet with yellow base.

TSUTSUMIYAMA, of medium size, bright yellow.

SUMA-NO-URA, medium, pale rose.

A collection of above 12 plants

at 10/-

FOR PLANTS OF MEDIUM SIZE

each 1/-

OTOHIME, medium, red purple tubular florets.**KYOKOMACHI**, large, beautiful pale rose narrowly edged with white.**SATOKAGURA**, medium, most intense vermilion scarlet.**MIKAGEYAMA**, medium, fine rose.**NISHO**, medium, attractive red.**KYRANISHIKI**, large, vermilion red quilled florets.**MYOGETSU**, medium, narrow tubular florets.**SHIROTAI**, very small, white.**NISHIKI**, pale pink with yellow brown base.

A collection of above 8 plants

at 7/-

FOR PLANTS OF SMALL SIZE

each 1/-

KINSUJU, very small, golden yellow.**SHINNYO**, medium, pure white.

Seeds carefully collected from the best

varieties per pkt. 1/-

per 10 each

ASTER TRINERVIS CONGESTUS HORTENSIS, "Cascade Aster". Any collection of Cascade Chrysanthemum will feel missing without this aster. It has recently been found that this peculiar aster can be grown so satisfactorily that it so grown is taken as an intense violet coloured Cascade Chrysanthemum at a glance. It can be easily grown in the cascade style by the same care of culture and management and may require a little more cares to keep it from insects. It has attractive intense violet flowers nearly 1 inch in diameter in the late autumn and is very floriferous. The colour is very attractive and pleasing and does not fade away. A well grown specimen plant grown in the cascade style is an amazingly splendid spectacle

12/- 1/6

ORNAMENTAL TREES & SHRUBS

In this general catalogue I selected and inserted only the most beautiful decorative plants well worth included in every garden. But to those who are collectors or are interested in any other items, I shall be pleased to send a separate complete list comprising exclusively all the native plants which have a garden value. Some of the commoner and widely distributed kinds are also omitted in this English catalogue. See also "Plants for Rockeries". Those marked * are also very suitable for rock garden planting.

	each	per 10
Abelia chinensis grandiflora , graceful white tubular flowers in a great abundance.....	8/-	80/-
Acer argutum , five or seven-lobed large leaves.....	2/6	20/-
— carpinifolium . The entire foliage closely resembles that of the Hornbeam	1/-	8/-
— circumbatium , closely related species to <i>A. japonicum</i>	2/6	20/-
— HEIHACHI , cultivated variety with finely cut leaves, very fine	1/6	12/-

	each	per 10
— <i>crataegifolium</i>	2/6	20/-
— — <i>VEITCHII</i> , cultivated variety with broad melon-like leaves variegated with green yellow.....	1/6	12/-
— <i>dialobicum</i>	2/6	20/-
— <i>Ginnala</i>	2/6	20/-
— <i>japonicum</i>	1/-	8/-
— — <i>aureum</i> , yellow-leaved.....	1/-	8/-
— — <i>KASADO</i> , leaves divided in thirteen lacinated lobes.....	1/6	13/-
— — <i>MATSUYOI</i>	2/6	20/-
— — <i>PERSONII</i> (<i>laciniatus</i>) (<i>filiicifolium</i>), leaves deeply divided in lacinated lobes	1/-	8/-
— — <i>SAYOSHIGURE</i> , small leaves	2/6	20/-
— — <i>KOKONOE</i> , leaves divided in 11 rounded lobes.....	2/6	20/-
— <i>Miyabei</i> , interesting ornamental leaves.....	2/6	20/-
— <i>micranthum</i>	2/6	20/-
— <i>nikoense</i> , fine autumnal leaves.....	1/6	12/-
— <i>palmatum</i>	-/6	2/-
— — <i>AKAJI-NISHIKI</i> , young shoots and leaves brilliant fiery scarlet	1/6	12/-
— — <i>argenteo marginatum</i> , neat silver variegation.....	1/-	8/-
— — <i>atropurpureum</i> . <i>Grafted plants from the best strain in existence</i>	1/-	8/-
3 of 4 year old seedlings from the best strain.....	-/6	3/-
— — <i>aureum variegatum</i> , fine yellow and golden variegation...1/-	1/-	8/-
— — <i>Crippsi</i> , most elegantly cut bronzy foliage.....	1/-	8/-
— — <i>crispum</i> , much crisped leaves and branches.....	1/-	8/-
— — <i>corallinum</i> , coral tinted small leaves.....	1/-	8/-
— — <i>dissectum</i> , finely cut leaves and somewhat pendulous habit	1/-	8/-
— — — <i>atropurpureum</i> , finely cut leaves deep crimson in summer and autumn and somewhat pendulous habit.....	1/-	8/-
— — — <i>flavescens</i> , leaves yellow in autumn.....	1/-	8/-
— — — <i>ornatum</i> , pale bronzy leaves.....	1/-	8/-
— — — <i>variegatum</i> , fine cut bronzy leaves with yellow and pink variegation.....	1/-	8/-
— — — <i>palmatifidum</i> . The foliage is very finely cut, giving the plant a fern-like aspect and bright green.....	1/-	8/-
— — <i>DAIMYO-NISHIKI</i> . Leaves large, bright crimson with fiery scarlet variegation. One of the best.....	2/-	16/-
— — <i>flavescens</i> . Variegated with cream and yellow on a dark green ground	1/-	8/-
— — <i>linearilobum</i> . Long narrow leaflets, very neat grower...1/-	1/-	8/-
— — — <i>atropurpureum</i> . Leaves dark crimson all the summer...1/-	1/-	8/-
— — <i>HIGASAYAMA</i> , small leaves edged with bronze.....	1/-	8/-
— — <i>HANAZONO-NISHIKI</i> , small leaves with rose variegation...1/-	1/-	8/-
— — <i>KOSHIBORI-NISHIKI</i> , small leaves red-variegated and with white spots.....	1/-	8/-
— — <i>MATSUE-NISHIKI</i> , small green leaves edged with pale pink	1/-	8/-
— — <i>nigrum</i> , dark purple foliage.....	1/-	8/-
— — <i>atro purpureum</i> , deep bronzy crimson leaves all the spring and summer.....	1/-	8/-
— — — <i>superbum</i> . The foliage is bright red, vivid and semi- transparent, turning to deep purple in summer.....	1/-	8/-
— — <i>roseo-marginatum</i> , leaves pale green, irregularly edged, marked with coral pink.....	1/-	8/-
— — <i>sessilifolium</i> . Foliage green, slightly tinted, twisted and divided	1/-	8/-
— — <i>SUMINAGASHI</i> , leaves large, black intense crimson.....	1/-	8/-
— — <i>septemlobum</i> . 2 or 3 year old seedlings from the best strain -/6	-/6	3/-
— — — <i>elegans</i> , green in summer but bright crimson in autumn	1/-	8/-
— — — <i>purpureum</i> , dark bronzy crimson foliage.....	1/-	8/-
— — — <i>lutescens</i> , glossy green foliage turning in autumn clear butter-yellow	1/-	8/-
— — — <i>OSAKAZUKI</i> . Large dull green leaves, changing in autumn to fiery orange, crimson and scarlet.....	1/-	8/-
— — — <i>rubrum</i> , very large foliage, blood-red in colour.....	1/-	8/-
— — <i>SHISHIGASHIRA</i> . Leaves thick dark green, undulated. Of curious compact growth	1/-	8/-
— — <i>TEIHO</i> . Large leaves with yellow variegation.....	1/-	8/-
— — <i>versicolor</i> . Leaves are partly variegated rose and white 1/-	1/-	8/-

12 Japanese maples in 12 fine sorts, my selection, named

10/-

24 Japanese maples in 24 fine sorts, my selection, named

20/-

- **pictum**, very variable species of great decorative value.....2/6 20/-
- **MAYRI**, young foliage bright red.....2/6 20/-
- **MONO**2/6 20/-
- **FUTAGOTAMA**, leaves deeply divided in five lobes.....2/6 20/-
- **album**, 7 or 8 lobed large leaves white-variegated.....1/- 8/-
- **rufinerve**1/- 8/-
- **Sieboldianum**, rather related species to *A. japonicum*.....2/6 20/-
- **AYAIGASA**, leaves small, seven-lobed.....1/- 8/-
- **KASATORIYAMA**2/6 20/-
- **laxifolium**2/6 20/-
- **Tschonoskii**, fine small-leaved species.....1/6 12/-
- **trifidum**.....1/- 8/-
- **folis-alboreseum**, young leaves white and pink in spring for a few months and bright scarlet in summer.....2/6 20/-
- Actinidia arguta**, strong growing ornamental climber with white flowers in summer, evergreen.....1/- 8/-
- **polygama**, an ornamental climber with white flowers, deciduous1/- 8/-
- **Kolomikta**, a beautiful deciduous climber with white and pink variegation on the young foliage.....1/- 8/-
- Albizia jubibrissin**. A specimen covered with its clear pink flowers in July is really a magnificent sight.....-/6 4/-
- Amelanchier asiatica**, deciduous tree with short panicles of white flowers1/6 12/-
- Andromeda japonica**. *Fine specimen plants*.....-/10 7/6
- **folis-variegata**. *Fine specimen plants*.....1/6 12/-
- Ardisia crenulata**. *Pot-grown plants with berries*.....1/6 12/-
- **crispa**. *Pot-grown plants with berries*.....1/8 15/-
- **fructo luteo**. *Pot-grown plants with berries*.....2/- 17/-
- * **Azalea Albrechtii**, a deciduous Azalea with beautiful purple flowers in early spring. Considered one of the very finest Rhododendrons by the Rhododendron Association in England3/- 25/-
- * — **amagianum**, a larger form of *R. Weyrichii*, just like a scarlet *R. Schlippenbachii*4/- —
- * — **amoenum**, bright rose magenta1/- 8/6
- * — **Bungonishiki**, a hybrid between *A. Kaempferi* and *A. macranthum* with beautiful salmon scarlet double flowers...2/6 20/-
- * — **dilatatum** (*reticulatum, rhombicum, decandrum*), a very beautiful deciduous species with beautiful purple flowers in a great abundance in early spring. Very easy to grow. *Extra good specimens with great many flower-buds*.....2/6 20/-
- * — **roseum**, a beautiful warm rose coloured form, very fine...8/- —
- * — **leucanthum**, a pure white form of the type, very attractive. A few plants will be available in 1936.....8/- —
- * — **eriocarpum**, a beautiful species with enormous lavender flowers waved at the edge. Of very compact and very densely twiggy and strong healthy growth with leathery, deep green, tiny, obovate-shaped leaves. Very recommendable and very desirable for rock garden planting.
Strong 7-10 years old plants from cuttings.....2/6 22/-
- * — **GUMPO**, an unbelievably wonderful Azalea of great merit which I can not recommend too much. The habit is very compact, spreading, attaining to rarely more than 8 inches high ultimately and of very strong healthy growth. The leaves are also very small, usually less than $\frac{5}{8}$ inches in length, obovate oblong, stiff, thick, leathery and glossy green above. While the pure white flowers are widely open, usually 4-5 inches across and well shaped with frilled edges recalling those of *Rhodo. Loder's White*. Best for rockery as well as for ground covering plantation and cottage and woodland gardens, etc. I can even declare without any hesitation this is the finest dwarf shrub of easy culture in the world. *A. M., R. H. S. in England.*
Strong 6-10 year old plants from cuttings.....3/- 25/-
- * — **RED GUMPO**, even more beautiful an Azalea with enormous salmon rose flowers. Otherwise just same as the above.

- each per 10
- Strong 5-7 year old plants from cutting*.....4/- 35/-
- * — — **IZAYOI**, a little larger grower than Gumpo with still larger warm lavender rose flowers in a great abundance. Very recommendable.
- Strong 7-10 year old plants from cutting*.....2/6 22/-
- * — **hortense**, type species of *A. ledifolia* with purple flowers.....1/- 8/-
- **indicum**. I carry a large stock of some sixty foreign raised varieties of this greenhouse Belgian Azalea. A list of them will be sent separately to those interested. I can offer all of them,
- pot-grown 3 year old well budded plants,*
at 42/- per 100, 1/- 6/6
- A COLLECTION of 10 3 year o'd plants in 10 best varieties, my own selection* 8/-
- A COLLECTION of 50 3 year old plants in 50 best varieties, my own selection* 40/-
- — **Queen Elizabeth**, a most showy variety with large double white flowers edged clearly with scarlet.
- Strong pot-grown 3 year old plants, well budded*
70/- per 100, 1/8 10/-
- I grow, to meet orders from U. S. A. and Canada, all my plants in a special composition of course peat and sand, so that root damages are minimized when the soils among the roots are washed away.*
- * — **japonicum flavum**, a well known deciduous species with bright yellow flowers in a large truss.....1/6 12/-
- * — — **rubrum**, bright orange red, otherwise like the preceding...1/- 8/-
- * — **Kaempferi**, most hardy species with salmon rose to bright crimson scarlet flowers hidening the leaves.....1/- 8/-
- * — — **purpureum**, true colour variation with bright purple flowers, very hardy1/6 12/-
- * — — **album**, another true colour variation with pure white flowers, very hardy1/6 12/-
- * — — **semperflorens**, ever-flowering variety of the type, very hardy1/6 12/-
- * — **kiusianum montanum**, very dwarf tiny shrub with minute leaves and an abundance of rich red purple flowers large for the size of plant and leaf. Does not grow out large from its tiny size under any condition. Very good for rockery. Only 3 to 6 inches high.
- Very strong plants*.....2/6 30/-
- * — **komiamae**, a new species which should be much hardier than *R. tosaense*, its near cousin, with deep purple flowers tiny in size but numerous in number. Forms a dwarf and very densely branched fine shaped compact shrub recalling the best shaped dwarfed shrubs in the Bonsai style. The best forms have flowers of intense violet purple. *Strong specimens*.....2/6 20/-
- * — **kurumanthum**, new hybrids between *Azalea Kurume* and *R. macranthum* with combined merits of the early flowering property of the former and the large flowering habit of the latter. So this new strain is a really valuable introduction to our garden.
- A COLLECTION of 10 plants in 10 best named varieties* 30/-
- * — — **FUJI-NO-MINE**, the best white of this strain.....4/- 32/-
- * — — **MOMOZONO**, beautiful salmon rose.....4/- 32/-
- * — — **HI-NO-TSUKASA**, most beautiful crimson scarlet.....4/- 32/-
- * — **linearifolium**, star-like flowers with narrow petals, white flushed lavender slightly.....1/6 12/-
- * — — **macrosepalum**, pale purple flowers, rather resembles *A. hortense*1/- 8/-
- * — **macranthum**, salmon red flowers in June and July.....1/- 8/-
- * — — **coccineum**, intense fiery crimson scarlet form, strong vigorous grower, very fine and recommendable.....1/6 12/-
- * — — **praecox roseo-marginatum**, wonderfully vigorous spreading grower with enormous flowers white margined with warm rose, often 5 inches across. A very early bloomer. Very recommendable.
- Strong specimen plants*.....3/- 25/-

- * — **album grandiflorum**, very large white flowering hybrid,
strong vigorous grower, very recommendable.
Strong specimens 1/6 12/-
- * — **polypetalum**. The flowers are bright red and have great
many narrow petals..... 3/- 25/-
- * — **balsaminaeflorum**, full double form of the type..... 1/6 12/-
A COLLECTION of 10 plants in 10 best *macranthum*
varieties, my own selection at 15/-
A COLLECTION of 50 plants in 50 best *macranthum*
varieties, my own selection at 70/-
- * — **macrandicum**. From various crosses between the best varieties
of R. *macranthum* and those of R. *indicum*, very fine
meritable hardy Azaleas have been produced with finer
and larger flowers at earlier season than the former.
Some fifty varieties have already been recorded.
A COLLECTION of 10 plants in 10 best named
varieties, my own selection at 40/-
A COLLECTION of 25 plants in 25 best named
varieties, my own selection at 100/-
- * — **mucronatum** (*A. ledifolia*), a pure white coloured variety of A.
hortense 1/- 8/-
- * — **Noordtianum**, a larger, more vigorous grower with larger
white flowers, very recommendable 1/6 12/-
- * — **narcissiflorum**, white double flowers.
- * — **striatum**, pale purple purple-spotted form 2/- 17/-
- * — **obtusum Kurume**, a well known Azalea. I grow this Azalea
extensively.
A COLLECTION of 10 plants in 10 best named
varieties, my own selection at 8/-
A COLLECTION of 50 plants in 50 best named
varieties, my own selection at 40/-
A COLLECTION of 100 plants in 100 best named
varieties, my own selection at 100/-
(For smaller well budded plants 40% discount allowed)

*Standard specimens, 12 inches high and
12 inches across at the head* 7/- 60/-

A COLLECTION of 10 standard specimens of
the above size in 10 best named
varieties, my own selection at 80/-

The following are a few of them : —

Large plants. 1/- each, 8/6 per 10, 60/- per 100

Medium plants. -/8 each, 6/- per 10, 40// per 100

- * — **KUMONOU**, salmon pink.
- * — **UCHIWAGASANE**, pink.
- * — **SHINMIYAGINO**, purplish red.
- * — **CHIYO-NO-AKATSUKI**, beautiful pink.
- * — **NISETSU-NO-KOMA**, pure white.
- * — **TSUTAMOMIJI**, salmon rose.
- * — **RAJOMON**, fiery red.
- * — **HINODEGIRI**, fiery scarlet.
- * — **MOROZUNO**, bright red.
- * — **INOITO**, bright red purple.
- * — **SNSONO-NO-ITO**, intense purple.
- * — **IMASHOJO**, intense fiery crimson.
- * — **MATEKKA**, blood crimson.
- * — **TAKASAGO**, pale rose.
- * — **AZAUMAKAGAMI**, pale pink.
- * — **YOIYOKI**, flesh pink.
- * — **SH.NO-NO-UE**, shell pink.
- * — **pentaphyllum**, one of the most beautiful deciduous Azaleas in
the world with beautiful pink flowers..... 4/- 35/-
- * — **pulchrum Omurasaki**, large purple flowers, very strong grower
..... 1/- 9/-
- * — **quinquefolium**, another very beautiful deciduous Azalea with
pure white flowers..... 3/- 25/-
- * — **scabrum**, the finest species in the world among the Azalea
with no doubt. The flowers are very large, waxy,
campanulated, bright fiery blood red with no trace of

purplish tinge, waved at the edge, opening at the same time as Azalea Kurume. A very strong vigorous healthy grower, flourishing well without any care and attaining ultimately to the height of some twenty feet.....2/6 20/-

* — **Red Emperor**, a very beautiful variety with widely open still larger flowers—as much as 5 inches in diameter. Otherwise the same as the type.....3/8 30/-

* — **KANOKO**, a very vigorous strong sturdy hybrid with enormous flowers pink splashed bright carmin on the upper lobe. Very floriferous.....2/- 16/-

* — **KINTAIYO**, another very vigorous hybrid with huge bright carmin flowers, six or seven lobed. Very showy and recommendable3/- 24/-

* — **scabrica**. By crossing Azalea scabrum with some of the best varieties of the Greenhouse Indian Azalea, vigorous growing hardy hybrids have been produced. All the varieties offered have stood 20 degrees of frost without any injury and have flowers as large as those of the parents with varied colours as Indian Azaleas. They are more rapidly absorbed by my Japanese customers than they propergate. So I offer here as collection.

A COLLECTION of 3 plants in three best named varieties at 12/-

* — **scabrume**, by crossing R. scabrum with R. Kurume, a very showy strain has been produced with intermediate habits between the parents and much larger flowers than the latter. It is certainly one of the most valuable introductions Japan has made.

A COLLECTION of 10 plants in 10 best varieties, my own selection 40/-

* — **SHIUN**, very large intense purple.....4/- 35/-

* — **HAKKEI**, immense salmon scarlet.....4/- 35/-

* — **SUKASA**, pale rose, very large, rounded lobes.....4/- 35/-

* — **TSUKIUMI**, pale salmon with white base, very large.....4/- 35/-

* — **TAIKAN**, huge orange crimson.....4/- 35/-

* — **GEMBU**, black purple red, very large.....4/- 35/-

* — **Schlippenbachii**, without doubt one of the finest deciduous Azaleas in the world with large white to rose coloured flowers in spring.....3/- 24/-

* — **serpyllifolium**1/6 12/-

* — **albiflorum**4/- —

* — **sbikokianum**, a minimized A. Weyrichii with brick red flowers3/- —

* — **tebotan**, purple red full double flowers.....1/6 12/-

* — **Tschonoskii**1/6 12/-

* — **Wadanum**, a minimized R. reticulatum.

Extra fine specimens, full of buds.....2/6 20/-

* — **Weyrichii**, a very fine deciduous Azalea with brick red flower2/6 20/-

* — **yedoense**, purple red full double flowers.....1/6 12/-

* — **poukhanense**, single form of the above.....1/6 12/-

Berberis Fortunei.....-/8 6/-

japonica Bealei (hyemalis)-/8 6/-

Camellia japonica.

A COLLECTION of 10 plants in 10 best varieties, my own selection 16/-

A COLLECTION of 50 plants in 50 best varieties, my own selection 80/-

— **alba grandiflora**, immense pure white.....1/- 8/-

— **SOKEKAKUSHI**, huge, semi-double, pure white flowers, the largest in Camellia. Just like a white C. reticulata...1/6 12/-

— **SHIROBOTAN**, enormous full double flowers recalling the flowers of Tree Peony.....1/6 12/-

— **magnoliaeflora alba**, semi-double, just like a very large white flower of Magnolia atellata2/- 16/-

— **nigra**, double black crimson.....1/6 12/-

— **TAROAN**, large widely campanulated single, one of the best, bright red2/- 16/-

— **ROGETSU**, pure white, large, broad rounded petals, single. Flowers from December.....1/6 12/-

— **SHIROWABISUKE**, large, rather funnel shaped, single. Flowers from November.....1/6 12/-

— — WABISUKE, single, not large, most beautiful salmon pink, Flowers from November.....	1/6	12/-
— — <i>purpurea</i> , soft purple, double.....	1/6	12/-
— — ARAJISHI, intense fiery scarlet, double, of immense size, very fine. Flowers from December.....	1/6	12/-
— — SEIJI, of giant size, white striped with red, beautifully doubled.....	1/6	12/-
— — KISHUTSUKASA, beautiful flesh pink, very large double		
— — MIHATA, bright crimson, single, beautiful stamens	1/6	12/-
— — YOIJIJIN, beautiful shell pink, single, large, beautiful stamens	1/6	12/-
— — HI-NO-HAKAMA, fiery crimson scarlet, single, very immense	2/-	16/-
— — HINOMARU, flatly open semi-double, intense crimson with a contrast of golden yellow protruding stamens.....	3/-	24/-
— — HANAKAGAMI, of Chinese origin. The flowers are of immense size, full double, and white sometimes, bright red sometimes, and sometimes white striped with red according to twigs	15/-	—
— — Purple King, of chinese orgin. The flowers are enormous, full double, bright purple.....	15/-	—
Camellia Sasanqua, one of the most showy flowering trees from November to January.

* Buxus microphylla (<i>Corean Box</i>), very hardy shrub most suitable for low-hedge making and border planting.....	1/8	6/-
Callicarpa japonica, beautiful autumn foliage and violet berries	1/6	12/-
Caragana Chamlagn, an attractive chinese leguminous shrub with yellow flowers.....	1/6	12/-
Cercis chinensis, Japanese Judus Tree, beautiful purple papilio- flowers in early spring on a leafless twig.....	1/-	8/-
* Chloranthus brachystachys. Only hardy representative of a tropical order. One of the few finest berry-bearing shrub with a mass of scarlet berries upon the deep green setting of leathery leaves in winter Very recommendable. Pot-grown	1/6	12/-
* — — fructo-luteo. Pot-grown	1/6	12/-
Clerodendron japonicum, beautiful tree with red flowers.....	1/-	8/-
Cornus kousa, beautiful species covered entirely with a sheet of white flowers. The flowering specimen is of an amazing beauty	1/2	10/-
— officinalis, beautiful korean species, literally covered with golden flowers before leaves appear.....	1/6	12/-
Corylopsis spicata, drooping yellow flowers in early spring.....	1/-	8/-
— pauciflora, dwarf species.....	1/-	8/-
— Sotoana, new species, near to both of the above.....	2/6	20/-
Clematis paniculata	-/6	3/-
— patens	-/6	3/-
— fl. pl.	1/-	8/-
— alba.....	1/-	8/-
— fl. pl. alba.....	1/-	8/-
— species Mantchuria, very fragrant flowers in a great abundance	2/-	16/-
Cydonia cathayensis, tall growing shrub, white flushed pink...1/6		12/-
* — japonica, dwarf shrub attaining to 8 feet, very beautiful flowers in winter or spring or from autumn to spring.

— — VAEGAKI, large double, cup-shaped, beautiful terra-cotta brown rounded petals, winter-bloomer.....	3/-	24/-
— — TENMEI, large full double, intense crimson, flowers from autumn to spring	2/6	20/-
— — RAKUYO, large double, vermilion orange, spring-bloomer	3/-	24/-
— — ZANSETSU, immense, single, cream.....	3/-	24/-
— — KOSHI-NO-YUKI, semi-double, of immense size, chalice-shaped, flowers from autumn to spring.....	3/-	24/-
— — HI-NO-TSUKASA, single, very large, fiery scarlet.....	1/6	12/-
— — TATTAGAWA, large, saucer-shaped, deep terra-cotta brown shaded yellow towards the base.....	1/6	12/-
— — KOKUKO, semi-double, bright black red, flowers from autumn to spring	1/6	12/-
— — MOMIJIYAMA, single, very beautiful vermilion, winter-bloomer	1/6	12/-
— — CHOSHUN, single, large, beautiful terra-cotta, winter-bloomer	1/-	8/-
— — KOSHI-NO-HOMARE, large double, bright vermilion red, winter and spring-bloomer.....	1/-	6/-
— — BENIBOTAN, immense, chalice-shaped, bright red, winter and spring-bloomer	1/-	8/-
— — SHIROBOTAN, immense single, pure white, winter-bloomer	1/-	8/-
— — WAKABA, large semi-double, pale terra-cotta.....	1/-	8/-
— — TANI-NO-YUKI, bright red with white base, single.....	1/-	8/-
— — HANAZONO, bright red, single, winter-bloomer	1/-	8/-
— — BENICHIDORI, bright crimson, single, winter-bloomer.....	1/-	8/-
— — HAKUGYOKU, large single pure white	1/-	8/-
* <i>Daphne odora</i> . Well budded plants.....	-/8	4/6
* — <i>alba</i> . Well budded plants	-/8	4/6
* — <i>marginata</i> . Well budded plants.....	-/8	4/6
* — <i>alba</i> . Well budded plants	-/8	4/6
* — <i>pseudo-mexerum</i> , yellow form of <i>D. mexerum</i>	1/6	12/-
* — <i>Genkwa</i> , very fine purple flowers all along the leafless twigs. Nice specimens.....	1/-	8/-
<i>Daphniphyllum macropodum</i> , just like a large-leaved <i>Rhododendron</i> , young shoots and leaves being tinted with pink.....	1/-	8/-
* <i>Disanthus cercidifolia</i> , crimson Witch Hazel-like flowers in autumn. The shiny, Judas Tree-like foliage in form changes to a riot of claret red and orange. Specimen bushes.....	2/6	22/-
* <i>Enkianthus campanulatus</i> . Well budded specimens, 3 feet high.....	2/-	16/-
* — <i>albiflorus</i> , pure white form. Well budded specimens, 2 feet high	2/-	16/-
* — <i>Palabini</i> , deep red form. Small plants.....	1/-	8/-
* — <i>cernuus</i> var. <i>rubens</i> , maroon red flowers. Nice specimen plants	2/-	16/-
* — <i>japonicus</i>	1/-	8/-
* <i>Ficus pumila</i> , fine creeper with tiny grossy leathery green leaves, creeping on rock and wood, very hardy.....	-/6	3/-
<i>Gardenia gigantea</i> , enormous double flowers 4-5 inches across...-	/8	5/-
* — <i>radicans</i> fl. pl., pygmy <i>Gardenia</i>	-/6	3/-
<i>Hamamelis japonica</i> , important winter-flowering shrub.....	1/6	12/-
— <i>flavo-purpurascens</i> , golden yellow flushed purple.....	1/8	15/-
— <i>nobilis</i> . Petals and calyxes are all golden yellow.....	1/8	15/-
<i>Hoya carnosa</i> , thick succulent leaved climber with pink waxy Dephne-like flowers in a corymb. Very showy but tender	1/-	8/-
— <i>albo-marginata</i>	1/6	12/-
— <i>variegata</i>	1/6	12/-
* <i>Hypericum chinense</i> , most beautiful Chinese species.....	-/8	6/-
<i>Hydrangea paniculata grandiflora</i>	-/3	4/-
— <i>scandens</i> , climbing <i>Hydrangea</i>	-/6	4/-
<i>Gordonia axillaris</i> , highly ornamental with thick leathery leaves and white flowers 4 inches across.....	4/-	—
<i>Ilex integra</i> , popular evergreen	-/6	4/-
* — <i>crenata</i>	-/6	4/-
* — <i>Mariesii</i> (<i>nummularia</i>), rare pigmy form.....	1/6	12/-
* — <i>fastigiata</i>	2/6	20/-
* — <i>variegata</i>	1/6	12/-
* — <i>cornuta</i> , rare Korean species.....	2/6	20/-

<i>Ilex latifolia</i> , magnificent evergreen, hardy.....	2/-	16/-
— <i>rotunda</i> , very showy evergreen, very recommendable.....	1/6	12/-
* — <i>serrata fructo-purpurea</i> , numerous bright purple berries in winter, very rare	1/2	10/-
* — — <i>Sieboldii</i> , very fine small shrub with an abundance of red berries	1/-	8/-
* — — <i>leucocarpa</i> , form with white berries.....	1/6	12/-
<i>Illicium religiosum</i> , thick lustrous leaved evergreen with yellow Magnolia-like flowers	1/6	12/-
<i>Lagerstroemia indica alba</i>	-/6	3/-
— — <i>rosea</i>	-/6	3/-
— —, light claret	-/6	3/-
<i>Magnolia conspicua</i> , magnificent species well known to all.		
<i>Strong budded plants 1 to 2 ft. high</i>	1/6	12/-
<i>Strong budded plants 2 to 3 ft. high</i>	2/-	16/-
<i>Strong plants from bud-grafting, 3 ft. high</i>	2/-	16/-
— — <i>hybrida</i> , perhaps a hybrid between this and <i>Soulangiana nigra</i> , red flowers	5/-	—
— <i>grandiflora ferruginea</i> . <i>Strong grafts</i>	1/-	8/-
— <i>hypoleuca</i>	-/6	4/-
— <i>kobus</i>	-/6	3/-
— <i>parviflora</i>	1/6	12/-
— — <i>semi-pleno</i>	1/6	12/-
— <i>pumila</i> , highly ornamental, attractive and highly fragrant flowers.		
<i>Pot-grown</i>	2/6	20/-
— <i>Soulangiana nigra</i> , intense dark vinous purple, very fine.		
<i>Strong budded plants</i>	1/6	12/-
— — <i>Brozzonii</i> , white tinged purple. <i>Strong budded plants</i>	1/6	12/-
— <i>stellata</i> . <i>Strong budded plants</i>	1/-	8/-
— — <i>rosea</i> . <i>Strong budded plants</i>	1/6	12/-
— <i>salicifolis</i> , Fragrant Kobus. The flowers and all parts of the bark, the wood and the leaves emit all a sweet aromatic scent	1/-	8/-
— <i>Watsonii</i> , white fragrant globular flowers.....	1/6	12/-
<i>Milletia japonica</i> , the Japanese "Summer Wistalia".....	1/6	12/-
<i>Michelia champaca</i> , very fragrant creamy white flowers, very ornamental Magnolia-like shrub. <i>Pot-grown</i>	2/-	16/-
<i>Nandiana domestica folis-atropurpurea</i> , new variety of great merit. The persistent grossy leathery green leaves assume a richest colour of intense blood crimson all winter.....	2/-	16/-
<i>Osmanthus Delavayi</i> , chinese species, fragrant white flowers in spring. Best of the genus.....	-/6	4/-
— <i>Fortunei</i> , handsome foliated hybrid with roundish holly-like leaves.....	1/3	10/-
— <i>fragrans</i> , ornamental evergreen with highly fragrant flowers in autumn	1/3	10/-
— — <i>semperflorens</i>	1/3	10/-
— — <i>aurantiacus</i> , more strongly fragrant, terra-cotta yellow flowers.....	1/3	10/-
<i>Paeonia moutan</i> , type species, purple flowers.....	1/-	8/-
<i>Pasania Sieboldii</i> , most beautiful evergreen tree and eminently suitable for wind shelter. The dark grossy leathery green leaves are ferruginous beneath and numerous clothed the densely branched twigs.....	1/-	8/-
<i>Phellodendron japonicum</i> , handsome foliage, best of genus.....	1/-	8/-
<i>Photinia glabra rubrens</i> , most beautiful red leaved form	1/-	8/-
<i>Pittosporum Tobira</i>	-/6	3/-
* <i>Prunus alpina</i> , very dwarf shrub 2 to 3 feet high with pink flowers. Perhaps alpine form of <i>Prunus incisa</i>	2/6	20/-
— <i>Armeniaca Ansu</i> , the chinese "Apricot", pink or white flowers and very delicious fruits	-/6	4/-
— <i>campanulata</i> , perhaps the finest cherry in the world attaining to 30 to 40 feet, covered with crimson campanulated flowers in late winter. The colour varies according to plant and the best form has bright intense crimson flowers.....	1/6	12/-
— <i>japonica flore albo pleno</i> , a wealth of tiny white flowers.....	1/-	8/-
— — — <i>roseo pleno</i> , pink double form.....	1/-	8/-
— <i>Kanzakura rubra</i> , perhaps a hybrid form of <i>P. campanulata</i> . The flowers are nodding, campanulated, crimson rose and open in February in a great abundance. Attains to 10 feet slowly	-/8	5/-

- *Lannesiana praecox*, a new meritable sport, flowering earlier by two weeks than the type, otherwise the same.....1/6 12/-
- — & *P. serrulata*. Please see my sepearte list of Japanese cherries. All varieties can be had at 5d each and 3/6 per 10 unless otherwise described.
- *Mume*. Perhaps the most popular flowering species in Japan on account of the fragrance and beauty and earliness of opening of the flower. The beauty and fragrance in mid winter over snow-clad gardens make this unforgettable and indispensable.

- *Banksiae*, chinese species with yellow double flowers.....-/8 5/-
- *laevigata*, pure white fragrant flowers up to 6 inches across. The finest of all single roses.....-/6 4/-
- — *rosea*, new red purple form, very fine.....2/- 16/-
- *Luciae*, large corymbs of fragrant pink flowers.....1/8 15/-
- *Uchiyamana*, beautiful rose flowers iu a small truss.....2/- 16/-
- * — *Wichuraiana*, creeping rose with white flowers.....-/6 4/-
- * *Rhaphiolepis japonica*, fragrant white flowers, thick lustsous leaves, very oramental-/6 4/-

Rhodotypos tetraptera , the Japanese "White Kerria".....	1/6	12/-
Rubus Commersonii , chinese species with large white double flowers, the finest in the genus.....	1/6	12/-
* — spectabilis vernus , bright purple, the finest species in Japan, comer from alpine region.....	1/6	12/-
Rhododendron . See also <i>Azaleas</i> .		
* — chrysanthum , one of the Japanese alpine gems, creeping dwarf shrub with shiny oval-shaped leaves of thick leathery texture and good yellow flowers 2 inches across. 2/- to 15/- each		
* — dauricum , purple flowers in late winter.....	1/6	12/-
* — degronianum , waxy pink flowers in a large truss.....	1/8	15/-
* — brachycarpum montanum lutescens , alpine form of the type of dwarf creeping habit with sulphure coloured flowers. 2/- to 15/- each		
* — roseum , a distinct deep rose form with rounded leaves...7/-		—
* — Keiskii , spotless yellow flowers in early spring. Belongs to the Triflorum series but most easy to grow among the series. Can resist strong summer heat and drought.....	2/6	20/-
* — Makinoi , narrow leaved species, pink flowers in a large truss, distinct species.....	2/-	19/-
* — Metternichii , rare species with very fine large rose flowers which are seven-lobed. The finest species in Japan and has flowers most akin to the Fortunei subseries, and the leaves are more ornamental with large thick grossy leathery green leaves. As this Rhododendron comes from a low elevation of 800 to 2.000 feet, it can resist sudden changes of temperature, heavy droughts and strong summer heats just as <i>R. ponticum</i> . As easily grown as <i>R. ponticum</i> but has by far beautiful flowers. Flowers at a young age of 5 or so as <i>R. sutchuense</i>	2/6	20/-
Smaller plants	1/3	10/-
* — Wada's Form , a very interesting form recently found by me. Distinctly differs from the type in having ornamental leaves with fine deep cinnamon brown and dence wooly tomentum beneath as <i>R. mallotum</i> and is by far much compacter a grower. Supposed by me to be intermediate between the type and <i>R. Makinoi</i> . Very good for rockery.....	3/-	25/-
* — metternianum , a five or six lobed flower form of true Rhododendron Metternichii with very large white to pink flowers. A comer from a very low elevation and very easy to grow under any condition. Moreover this is a dwarf grower and flowers when 7 to 9 inches high at the age of 5 or 6 and very desirous for rockery. Try where any of Chinese Rhododendrons fails.....	2/6	20/-
Strong specimens 5/- to 30/- each		
* — mucronulatum , related species to <i>R. dauricum</i> , winter bloomer, very hardy, one of the best species.....	1/6	12/-
* — niko-montanum , erect growing form of <i>R. chrysanthum</i>	2/6	20/-
* — yakusimanum , related to <i>R. Makinoi</i> . Small plants	10/-	—
Salix bobytonica crispa , leaves and shoots well crisped, makes a fine shaped tree of graceful pose.....	1/6	12/-
* — vulpina , dwarf drooping shrub, beautiful grossy leathery green leaves, resembles very much <i>Leucothoe Keiskii</i> in appearance. Best for rockery and slopy place.....	-/1	6/-
Sapindus Mukurosil , ornamental leaved tree.....	1/6	12/-
Schizophragma hy drangeoides , very beautiful climbing Hydrangea	-/6	4/-
* Skimmia japonica	-/8	5/-
* — fructo-alba , very rare.....	1/2	10/-
Spiraea cantoniensis	-/6	2/-
— flore pleno	-/6	4/-
* — japonica	-/6	2/-
— Fortunei , larger finer form.....	-/8	6/-
* — prunifolia flore pleno	-/6	3/-
— sorbifolia stellipila	-/6	3/-
* — Thunbergii	-/6	2/-
Stachyurus praecox , pendulous racemes of yellow flowers in early spring, very fine shrub.....	1/-	8/-
Staphyllea bunulda , ornamental shrub, neat grower	1/-	8/-
Stauntonia hexaphylla , splendid lustrous evergreen climber, white		

	each	per 10
very fragrant flowers, large purple fruits.....	-/6	4/-
<i>Stephanandra flexuosa</i> , fine panicles of white flowers.....	-/6	4/-
— <i>Tanaka</i> , fine autumnal foliage	-/6	4/-
<i>Sterculia platanifolia</i> , long racemes of yellow flowers.....	-/6	3/-
<i>Stewartia monadelpha</i> , numerous camellia-like white flowers...	1/6	12/-
— <i>pseudo-camellia</i> , larger white flowers, fine autumnal foliage	1/6	12/-
— <i>serrata</i> , intermediate species of the above two.....	1/6	12/-
<i>Styrax japonicum</i> , small tree, pendulous pure white snow-drop-like flowers in great profusion.....	1/-	8/-
— <i>obassia</i> , finest of genus, larger white flowers, large beautiful leaves.....	1/-	8/-
<i>Syringa japonica</i> , white trusses.....	-/8	6/-
— <i>Palabianiana</i> , pale mauve, early	1/6	12/-
* <i>Serrisa foetida</i> , small shrub, nice for dwarf hedging, numerous white flowers in summer	-/6	4/-
<i>Tamarix juniperina</i> , most graceful of genus.....	-/6	4/-
<i>Tecoma grandiflora</i> , very pretty climber, large orange trumpets in a large cluster	-/6	4/-
<i>Ternstroemia japonica</i> , one of the most beautiful evergreens, reddish laurel-like leaves, fragrant flowers, young leaves bright red	1/-	8/-
<i>Trachycarpus excelsus</i> , hardy palm. The fan-shaped leaves often 4 feet across are very striking.....	-/6	4/-
— <i>Fortunei</i> , Chinese form	1/-	8/-
* <i>Tripetalia paniculata</i> , deciduous shrub, long spikes of beautiful pink flowers in late spring.....	2/6	20/-
<i>Viburnum Carlesii</i> , finest of genus.....	1/-	8/-
— <i>dilatatum</i> , very floriferous, red berries in a great abundance in autumn	1/-	8/-
— <i>fructo luteo</i> , very rare.....	2/6	—
— <i>japonicum</i> (<i>macrophyllum</i>), lustrous evergreen.....	-/10	7/-
— <i>odoratissimum</i> , related species to the above.....	-/6	4/-
— <i>phlebotrichum</i> , near to <i>dilatatum</i>	1/-	8/-
— <i>Sandankwa</i> , most beautiful evergreen.....	1/-	8/-
— <i>Sieboldii</i> , dark glossy green leaves.....	1/-	8/-
— <i>tomentosum</i> , a wealth of sterile flowers, glorious autumnal foliage	-/10	7/-
— <i>plicatum</i> , one of the finest shrubs.....	-/6	4/-
— <i>Wrightii</i> , very fine red berries, crimson autumnal foliage.....	1/-	8/-
<i>Vitis coignetiae</i> , immense simple leaves, a riot of crimson in autumn	-/10	7/-
— <i>heterophylla</i> , very variable leaves	-/10	7/-
— <i>inconstans</i> (<i>Ampelopsis Veitchii</i>)	-/6	3/-
<i>Wistaria floribunda</i> (<i>brachybotrys</i>) (<i>polystachya</i>), violet blue flowers carried on racemes about 5 inches long.....	-/8	6/-
— <i>macrobotrys</i> (<i>multijuga</i>), very beautiful variety abundant pale lilac purplish-blue tinged flowers in long drooping racemes from 1 to 3 ft. long.....	-/10	7/-
— <i>alba</i> , white form	-/10	7/-
— <i>odorata</i> , sweet-scented white	1/-	8/-
— <i>flore pleno</i> , beautiful double form.....	1/-	8/-
— <i>rosea</i> , beautiful rose coloured form.....	1/-	8/-
— <i>superba</i> , superb form with still longer flower racemes attaining often to 8 feet, the Japanese "Nine Feet Wistaria"	1/6	12/-
— <i>roseo-tincta</i> , white flushed rose.....	1/-	8/-
— <i>Russelliana</i> , deeper purple coloured form.....	1/2	10/-
— <i>japonica</i> , white to pale yellow flowers.....	1/-	8/-
— <i>nitida</i> , very beautiful deep purple red flowers, come from Formosa	1/6	12/-
— <i>sinensis</i> (<i>chinensis</i>), large mauve flowers in dense racemes...	-/8	6/-
— <i>alba</i> , white form.....	-/8	6/-
<i>Zanthoxylum planispinum</i> , attractive foliage.....	1/-	8/-
— <i>schinifolium</i> , graceful foliage	1/-	8/-
<i>Zekova acuminata</i> , one of the largest deciduous trees.....	-/6	3/-

ROCK PLANTS

(See also the previous sections)

per 10 each

Compositae : —

- Ainsliaea Faurieana**, beautiful alpine from the southern part of Japan, 5 to 6 inches high, white flowers in the late autumn 10/- 1/4
- Antennaria dioica**, dwarf compact spreading plant, 2 to 3 inches high, tufted grey white leaves in a great abundance. Very choice for rockery..... 10/- 1/4
- Artemisia sericea**, the finest in the genus found in Japan, masses of finely cut silvery white foriage. Very useful for the decoration of summer rock gardens..... 5/- -/10
- Aster Asa Grayi**. Really a great acquisition and very useful for rockery. A dwarf creeping plant with tiny thick leaves and pale lavender blue flowers 1½ inches across upon raised stems from ground by 1 inch from the end of December to January. Also indispensable for winter decoration as a pot plant..... 5/- -/10
- **Lautureanus minutissimum**, astonishing very dwarf aster only 2 to 3 inches high, covered in October literally with a wealth of flowers fully one inch across which are large for the size of plant. Very useful for sunny barren places in the rock garden..... 5/- -/10
- **Savatieri**, neat growing Aster, 10 to 12 inches high, elegant pale lavender flowers in early spring which are about 1½ inches across and of a refined aristocratic beauty 2/6 -/5
- **atrocoerulea**, new alpine Aster, 4 to 5 inches high, very neatly habited, rather slow to propegate. The elegantly shaped flowers of an intensely vivid violet purple are one inch across and freely produced in early spring. The colour is very vivid, attractive and that rarely seen in any other kind of plant. A great favourite in Japan and certainly one of the very best alpine plants in the world. As of easy culture, eminently desirable for rockeries, beds and edgings..... 2/6 -/5
- **tataricum minor**, very dwarf form of the type with violet flowers in September in a great abundance..... 3/- -/6
- Cacalia Krameri**, not of floral beauty but valued for its rigid enormous leaflets spread upon a stem 8 to 10 inches high in an umbrella shape, which is very attractive and gorgeous 3/- -/6
- Chrysanthemum japonicum**, very desirable dwarf rock plant only 3 to 5 inches high, white flowers 2 inches across in autumn. Like a very minimized C. nipponicum..... 5/8 -/11
- **species korea**, a new alpine Chrysanthemum from Korea, near to C. hakusanense, 5 to 8 inches high, pink flowers nearly 1½ inches across and finely divided leaves... 10/- 1/5
- **Weyrichii**, very rare rock plant from the arctic region of Japan, 5 to 6 inches high, pink flowers in summer, very good for rockery..... 10/- 1/5
- Circium purpuratum**, gorgeous woodland plant about 4 to 5 feet high, enormous purple flowers about 5 inches across, very hardy, very fine plant for border also..... 3/8 -/7
- Erigeron glabratus nanus**, an alpine geographical form of the type with equally large purple flowers but its height is only one inch 12/- 1/10
- Leontopodium Fauriei**, the best of genus found in Japan..... 3/- -/6
- Ligularia japonica Clivorum**, a fine species of proved merit with large golden yellow flowers 2½ inches in across in June and July 12/- 1/10
- Solidaga Virgaurea minutissima**, a very fine and choice rock plant only one inch high with large golden yellow flowers 25/- 3/-

Campanulatae : —

<i>Adenophora nikoense</i> , alpine species, deep purple bells in August, 7 to 9 inches high.....	3/8	-/7
— — <i>alba</i> , white form of the above.....	9/-	1/3
— — <i>macrocalyx</i> , larger flowering form of the type, very good	9/-	1/3
— <i>polymorpha</i> Lamarckii, fine blue purple alpine species, 7 to 8 inches high	3/8	-/7
<i>Adonophora remotifolia</i> , tall growing Adonophora, numerous blue purple flowers, 2 to 4 feet high.....	2/6	-/5
— <i>Takedana</i> , only 8 to 10 inches high, numerous deep purple bells in Autumn.....	2/6	-/5
<i>Campanula lasiocarpa</i> , as beautiful as <i>C. Allionii</i>	10/-	1/4
— — <i>alba</i> , white form of the above.....	15/-	2/-
— — <i>superba</i> , finer larger flower form.....	20/-	2/6
— <i>pilosa dasyantha</i> , very fine alpine, as beautiful as the above	8/-	1/2
— — — <i>alba</i> , white form of the above.....	15/-	2/-
<i>Loberia sessifolia</i> , water loving Loberia with very fine blue coloured flowers, 5-6 feet high, best for waterside planting	3/-	-/6
<i>Perocarpa carnosa</i> , very beautiful Campanulatae, 3 to 5 inches high	5/-	-/10
<i>Phyteuma japonica</i> , Adenophora-like plant about 2 feet high, numerous purple bells	3/-	-/6
<i>Pratia begonifolia</i> , very beautiful creeping alpine from Formosa with violet purple flowers followed by attractive purple berries ½ inch in diameter which are large for the size of plant	8/-	1/2
<i>Wahlenbergia gracilis</i> , very fine deep blue flowers, ½ foot high	5/-	-/10
<i>Campanula punctata rubriflora</i> , very easily grownable alpine, large purple red flowers in summer.....	5/-	-/10

Valerianaceae : —

<i>Patrinia palmata</i> , easily grownable alpine species, 6 to 10 inches high, golden yellow flowers in July and August.....	3/-	-/6
— <i>sibirica</i> , very dwarf Patrinia from the northeast region of Japan, only 2 to 3 inches high, fine yellow flowers in summer.....	8/-	1/2
— <i>species korea</i> , an alpine species from Korea with fine display of flower in summer, palmate leaves.....	8/-	1/2

Caprifolaceae : —

<i>Linnaea borealis arctica</i> , creeping alpine shrub, tiny rounded grossy leaves, dainty bells white, lavender or rose in colour	8/-	1/2
-------------------------------------------------------------------------------------------------------------------------------------------	-----	-----

Gesneraceae : —

— — <i>atropurpurea</i>	—	2/-
— — <i>rosea</i>	—	2/6
<i>Lysionotus paucifolia</i> , evergreen dwarf shrub, thick leathery leaves, white tubular shaped flowers faintly tinged with pink which are 1½ inches in length.....	15/-	2/-
<i>Oreocharis primuloides</i> , interesting rock plant resembling Gloxinia in leaf and Achimenes in flower, hardy.....	3/-	-/6
— — <i>albiflora</i>	—	3/-
<i>Titanotrichum Oldhami</i> , very beautiful plant about 10 inches high, golden yellow tubular flowers 1½ inches in length. Can only be grown in a frost-sheltered place because not hardy enough	20/-	2/6

Orobanchaceae : —

<i>Aeginetia indica</i> , a very easily grownable parasitic annual of great beauty, parasitic on the root of living Miscanthus mainly, 4 to 5 inches high, very beautiful purple flowers in autumn. Sow the seed on the living root of Miscanthus which is growing vigorously.		
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

Seed: 2/6 per pkt.

Scrophulariaceae : —

Logotis glauca , thick leaves, fragrant beautiful purple flowers in August, 2 to 3 inches high, one of the best alpiners in Japan	10/-	1/4
Linaria japonica , thick oval shaped grey white foliage about ½ inch across, white spotted with yellow flowers, 5 to 6 inches high	5/-	-/10
Mazus stolonifera albiflora , very desirous plant for rockery as a carpeter with a wealth of pure white flowers in early spring	1/-	-/3
— rubriflora , pink form of the above.....	2/6	-/5
Pedicularis apochila , beautiful alpine species, 5 inches high, very beautiful red flowers in May.....	5/-	-/10
Pentstemon frutescens , 4 to 5 inches high, soft purple flowers, very desirous	6/6	1/-
Veronica senanensis , the finest alpine Veronica in Japan, 3 inches high, beautiful interesting flowers.....	2/6	-/5

Labiatae : —

Dracocephalum argunense , very beautiful plant with purple red flowers	5/-	-/10
Scutellaria species korea , new comer from the Korean Alps, intense violet flowers in great profusion. 4 to 5 inches high	5/-	-/10
Thymus Przewalskii , creeping shrub 2 inches high, fragrant mauve pink flowers, indigenous to Japan.....	5/-	-/10

Borraginaceae : —

Eritrichium nipponicum , attractive tiny alpine 2 to 3 inches high, white woolly narrow leaves, intense gentian-blue coloured flowers, one of the very best.....	6/3	1/-
Lithospermum Zollingeri , very beautiful Lithospermum, intensely gentian-blue coloured flowers, very dwarf.....	3/-	-/6
Mertensia vivularis japonica , very rare but very beautiful species of great merit with porcelian blue coloured flowers, 4 to 5 inches high.....	15/-	2/-

Polemoniaceae : —

Polemonium humile , very beautiful plant from the Kurile Islands 2 to 3 inches high, fine lavender flowers.....	10/-	1/4
— jezoana , dwarf fine species, 5 to 6 inches high, white or lavender flowers.....	8/-	1/2

Convolvulaceae : —

Calystegia japonica , creeping plant, beautiful flowers 2 inches across. Perfectly hardy even at the very coldest places	4/-	-/8
— soldanella , very good sea-coast plant of creeping habit, purple coloured flowers 3 inches across, hardy perfectly as the above.....	4/-	-/8
— subvolubilis , another hardy species just like an enlarged Calystegia japonica, very beautiful.....	4/-	-/8

Gentianaceae : —

Crawfordia trinervis , the "Climbing Gentain". The large berries are beautiful purple	2/6	-/5
Fauria Crista-galli , dwarf water loving alpine plant producing flower stems 5 to 10 inches high adorned with many white campanulated flowers in spring and autumn. Best for water-side	3/-	-/6
Gentiana algida sibirica , yellow flushed white flowers, 2 to 3 inches high	3/-	-/6
— axillariflora , very beautiful Gentian 1 foot high with tubular gentian-blue coloured flowers 2½ inches in length in September	8/-	1/2
— formosana , creeping small Gentian, pale pink flowers.....	—	3/6
— Igarashi , fine rare alpine Gentian from the northeast part of Japan, fine gentian-blue flowers.....	16/-	2/1
— Makinol , the finest Gentian in Japan with sturdy, erect, stout and thick stems 1-2 feet high, upon which a multitude of large trumpet shaped flowers of a finest gentian		

blue are produced in erect terminal umbel. The colour is very attractive and will not fail to win the admiration of any flower lover. May be most properly said a fine gentian-blue coloured <i>Gentiana lutea</i>	4/-	-/8
Extra strong flowering clumps.....	6/3	1/-
— <i>nipponica</i> , very beautiful tiny Gentian, very fine sapphire blue flowers large for the size of plant, only ½ inch high. Enormous specimen mats.....	12/6	1/8
— <i>scabra Buergeri</i> , dark blue tubular flowers 2 inches in length in late autumn	2/-	-/4
— <i>sikokiana</i> , blue tubular flowers 2 inches in length, 5 inches high	10/-	1/5
— <i>squarrosa</i> , spring flowering Gentian of tiny growth, fine blue flowers	2/-	-/4
— <i>Zollingeri</i> , another spring flowering Gentian, fine sapphire blue flowers.....	2/-	-/4
— <i>albiflora</i>	—	1/-
— <i>species korea</i> , like an intermediate species between <i>Gentiana Makinoi</i> and <i>G. scabra</i>	—	1/6
<i>Halenia corniculata</i> , alpine species, creamy yellow flowers...3/-		-/6
<i>Swertia bimaculata</i> , water loving plant, white flowers spotted black purple	4/-	-/8

Primulaceae : —

<i>Androsace chamaejasme arctica</i> , very dwarf species, white flowers, very rare	—	2/6
— <i>species korea</i> , dwarf species	—	2/6
<i>Lysimachia clethroides</i> , dense spikes of pure white flowers in summer.....	3/-	-/6
— <i>mauritanica</i> , purplish yellow flowers in dense spikes. Thrive best in a sandy place. A sea coast plant	4/-	-/8
— <i>japonica minutissima</i> , very dwarf creeping plant of dense growth, less than 1 inch high, yellow flowers ¼ inches across, best for moist position.....	8/-	1/2
— <i>vulgaris davurica</i> , tall growing species, yellow flowers in dense truss	3/-	-/6
<i>Primula cuneifolia typica</i>	—	1/6
— <i>hakusanense</i> , a very beautiful <i>Primula</i> with purple rose flowers large for the size of plant.....	4/-	-/8
— <i>heterodonta</i>	—	1/6
— <i>Fauriae</i> , near to <i>P. farinosa</i> but with golden farina beneath the leaves.....	3/-	-/6
— <i>modesta</i> , near to <i>P. Fauriae</i>	11/-	1/6
— <i>alba</i>	—	2/6
— <i>japonica</i> . Various colours mixed	2/-	-/4
— <i>hidacana</i> , very rare species from Hokkaido belonging to the section of <i>P. Reinii</i> , rather near to <i>P. Takedana</i> and said to be very fine.....	15/-	2/-
— <i>Takedana</i> , very rare species of the <i>Reinii</i> section and said to be the finest in the section with by far larger flowers than <i>P. Reinii</i>	—	3/-
— <i>species near to P. Takedana</i> , new species of the <i>Reinii</i> section —	—	2/6
— <i>senanense</i> , very rare species near to <i>P. Reinii</i>	15/-	2/-
— <i>tosaense</i> , species near to <i>P. Reinii</i> but much larger flowers	3/-	-/6
— <i>Reinii</i> , most common species among the section but one of the best <i>Primulas</i> in Japan.....	2/-	-/4
— <i>albiflora</i>	—	2/-
— <i>Sieboldii spontanea</i> , wild form	3/-	-/6
— <i>Sieboldii</i> .

Myrsineaceae : —

<i>Ardisia japonica</i> , very hardy dwarf species even having a distribution to the arctic region of Japan, 4 to 5 inches high, beautiful scarlet berries. Very easily grown and no care is needed. Very good as a ground cover...	3/-	-/6
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----	-----

Ericaceae : —

<i>Andromeda polifolia grandiflora compacta</i> , new very interesting form. This wonderful form is so much admired by Japanese people. It forms in itself without any pruning a dwarf flatish bush, recalling some of the best shaped dwarfed shrubs in the Bonsai style. It is a neat, compact and spreading grower eminently suitable for rockery, pot-culture, etc. etc. The dwarf compact fancy style which it forms without any artificial cares, covered with numerous larger pink bells, will be sure to make it in craze in your country when it is introduced.		
<i>Flowering plants from cutting</i>	10/-	1/5
<i>Well grown specimen plants in pans</i>	40/-	5/-
— <i>minima</i> , rare minute form from the northeast region of Japan, only 2 inches high at most.....	—	3/-
<i>Arctica nana</i> , good rock plant of neat growth, small oval-shaped shiny leathery thick leaves, white flowers...	15/-	2/-
<i>Azaleas</i> . See page 23.		
<i>Bryanthus musciformis</i> , very small creeping shrub with many small rose coloured flowers in truss, only ½ inch high.		
<i>Good well rooted specimen mats per sq. ft.</i>	20/-	3/-
<i>Cassiope lycopodioides</i> , white bells. <i>Good well rooted specimen mats per square feet</i>	6/-	1/-
— <i>species new</i> , more compact rigid grower with thicker stems than <i>C. lycopodioides</i> . The flowers are unknown to me. Easier to grow. <i>Good well rooted specimen mats per square feet</i>	15/-	3/-
<i>Chiogenes japonica</i> , creeping small plant with white flowers and berries. <i>Good well rooted plants</i>	—	2/6
<i>Gaultheria adenothrix</i> , small evergreen shrub with beautiful red berries. <i>Good well rooted plants</i>	20/-	2/6
— <i>Miquelliana</i> , small evergreen shrub with large white berries. <i>Good well rooted plants</i>	20/-	2/6
<i>Epigaea asiatica</i> . <i>Good well rooted plants with flower-buds</i> ...	15/-	2/-
<i>Harrimanella stellariana</i> , a creeping tiny shrub with small rose coloured flowers. Very good for rockery, ½ inch high at most. <i>Good well rooted specimen mats per square foot</i>	15/-	3/-
<i>Ledum nipponicum</i> , an evergreen small shrub with white flowers. <i>Good well rooted plants</i>	15/-	2/-
<i>Loiseleuria procumbens</i> . <i>Good well rooted plants</i>	12/-	1/7
<i>Leucothoe keiskii</i> , the Japanese "Rock Nandina". The leaves are grossy leathery deep green, very ornamental and like those of <i>Nandina domestica</i> . Ideal for rockery because of its pendant habit. The tubular campanulated flowers are ¾ inch long and pure white in colour, about one dozen of which are borne in a pendant truss. A. M., R. H. S. in England.		
<i>Extra good specimen clumps</i>	33/-	4/-
<i>Good well rooted plants</i>	10/-	1/4
<i>Menziesia cilicalyx bicolor (multiflora)</i> , a dwarf deciduous shrub, usually not more than one foot high, waxy white campanulated flowers shaded red at the mouth. Eminently suitable for rockery. <i>Strong well rooted plants</i>	20/-	2/6
— <i>lasiophylla</i> , purple coloured form of the above, very fine. <i>Strong well rooted plants</i>	20/-	2/6

	per 10	each
— pentandra , like a white coloured <i>Menziesia ciliicalyx</i> , forms a good combination with the above. <i>Strong well rooted plants</i>	11/-	1/6
Oxycoccus microcarpus , small creeping shrub with pink flowers and red berries. <i>Strong well rooted plants</i>	12/-	1/7
— palustris , like an enlarged form of the above. <i>Strong well rooted plants</i>	12/-	1/7
Phyllodoce Aleutica , small alpine shrub of tufted habit with greenish white flowers in a great abundance. <i>Strong well rooted specimen plants</i> . 1/6 to 10/- each		
— alpina , very rare species of the most dwarf growth with large (for the size of plant) rose flowers. <i>Strong well rooted specimen plants</i> . 1/6 to 10/- each		
— coerulea . <i>Strong well rooted clumps</i> 6/- to 10/- each		
— nipponica . <i>Strong well rooted specimen plants</i> . 1/6 to 10/- each

Ranunculaceae : —

Aconitum species korea , wonderful spring flowering species only 2-3 inches high with very large flowers for the size of plant, purple in colour. Very beautiful and a real gem. I can not recommend too much this species of easy culture and of great merit. Very new and scarce.		
<i>Strong flowering tubers</i>	18/-	2/3
Anemone chinensis , large blue flowers, comer from Mandshuria, said to be the finest in this section.....	6/6	1/-
— narcissiflora japonica , large white flowers.....	6/6	1/-
— nikoensis , dwarf plant with white tinted pink flowers in early spring	3/-	-/6
— Raddeana , species near to <i>A. alteica</i>	3/-	-/6
— alteica , the finest alpine Anemone in Japan. The chrysanthemum-like flowers are about 2 inches across and beautiful pale lavender in colour, 3 inches high.....	3/-	-/6
— cernua , dwarf species with deep reddish purple flowers in spring	4/-	-/8
— keiskeana , leaves purple beneath and flowers white or blue. Flowers in very early spring.....	—	1/6
— Taraoi kurilensis , very rare species with large yollow flowers	—	5/-
— nipponica , rare species having the same description as the above.....	—	2/-
Actaea acuminata , fine shade loving plant, white flowers in a great abundance in May and June.....	5/-	23/-
Adonis amurensis ramosa fl. pl.		
<i>Strong well flower-budded clumps</i>	6/6	1/1
— rubri-flora . <i>Strong plants</i>	15/-	2/-
Anemonopsis macrophylla , very beautiful plant of great merit, white purple tinted flowers, 1 foot high.....	5/-	-/10
Aquilegia akitensis kurilensis , the finest miniature Aquilegia in Japan with deep fine blue flowers large for the size of plant in early spring, 2 inches high, very early bloomer	5/-	-/10
— akitensis , as beautiful as the above but with slightly enlarged constitution in every part of plant.....	4/-	-/8
— flabellata , well known early flowering species.....	3/-	-/6
— Buergeriana , interesting Aquilegia with yellow flowers..	3/-	-/6
— species mandshuria , wonderful introduction with black flowers	10/-	1/5
— viridiflora , comer from Mandshuria with yellow flowers, very dwarfly habited, 3 to 4 inches high.....	15/-	2/-
— Fauriel , very rare species very dwarfly habited from Hokkaido with deep blue flowers.....	—	2/6
Callianthemum Miyabeaenum , recently found species of great merit 6-7 inches high, 8 petalled yellow flowers beautiful foliage, one of the best alpinos	12/6	1/8
Caltha pygmaea , like a small form of <i>C. pulustris</i>	5/-	-/10
Cimicifuga acerina intermedia , very fine shade loving species, beautiful white flowers in August and September.....	3/-	-/6
Delphinium brachycentrum , rare dwarf species from the northeast corner of Japan, only 8 inches high with black blue flowers	—	2/6
Eranthis pinnatifida , a Winter Aconite with white flowers in mid winter, very dainty.....	23/-	3/-

Glaucidium palmatum , a very fine alpine plant with the largest flower in Japan. The colour is very fine, attractive pale lavender blue and the flowers are very large and Meconopsis-like. Very recommendable. Loves a shady position as Meconopsis.....	6/4	1/-
<i>Enormous flowering clumps with many flower-buds</i>	18/4	2/3
— leucanthum	—	5/-
Hepatica species new , comes from Korea, larger white to rose or to intense gentian blue flowers in mid winter, very choice	6/6	1/-
— triloba angulosa , evergreen Hepatica, white, rose of intense crimson or rarely blue flowers in mid winter.....	per 100 20/-	3/-
Paeonia japonica , well worth growing for its richly coloured seed-heads only, white flowers, very early bloomer...4/-		-/8
— obovata , rose coloured flowers, richly coloured seed-heads	6/3	1/-
Coptis japonica , dwarf species excellent for rockery, white flowers in early spring.....	4/-	-/8
— japonica minima , miniature form of the above	4/-	-/8
— quinquefolia , very dainty species, white flowers in January and February	10/-	1/5
— ramosa , rare species of more beauty.....	—	3/-
— trifolia , pretty species, white flowers in May.....	15/-	2/-
Ranunculus Yaegatakensis , tiny creeping plant, only 1 inch high, golden yellow flowers.....	8/-	1/2
— pygmaeus , tiny species, only 1 inch high, golden yellow flowers	8/-	1/2
— auricornus , rare tiny species from the arctic region of Japan, golden yellow flowers.....	8/-	1/2
Semiaquilegia adoxoides , Aquilegia-like plant, white purple-tinted flowers from Spring to Autumn. Hybridizes well with any species of the genus of Aquilegia and produces interesting hybrids which flower for a very long duration as the former	3/-	-/6
Thalictrum coreanum , tiny species from Korea, 3-4 inches high small Cercidiphyllum-like leaves, small panicles of pink flowers	11/-	1/6
— integrifolium , tiny alpine species, 4-5 inches high, white panicles	11/-	1/6
— kiusianum , said to be the finest dwarf species among the genus on earth, 2-3 inches high, purple panicles. A. M., A. G. S. in England.....	5/-	-/10
— stipitatum , very near to Thalictrum alpinum.....		
— purpureum , like a erect form of T. kiusianum, very choice and fine	10/-	1/-
— tuberiferum , 4 5 inches high, large panicles of white flowers	5/-	-/10
— Rochebrunianum , very beautiful woodland plant 2-3 feet high, loose panicles of pale purple flowers, Maidenhair-like foliage, very fine.....	10/-	1/5
— anemoneoides , Mantschurian tiny species, 2-3 inches high —		4/-
Trollius japonicus , 6 to 8 inches high, golden yellow flowers over handsome shiny leaves.....	8/-	1/2

Caryophyllaceae : —

Dianthus japonicus , beautiful sea-coast plant 5-7 inches high, clusters of white, pink, red, purple and other various coloured flowers.....	4/-	-/8
— shinanensis , rare purple coloured flowers, 3 to 4 inches high	10/-	1/5
— species nana gigantea , very astoundingly wonderful Dianthus with enormous double fringed flowers nearly 4 inches across, while its height being 2 to 3 inches, beautiful rose without rings, glabrous leaves, of unknown parentage and origin, but cultivated since old times in Japan...20/-		2/6
— — — albiflora , white coloured version of the type.....	20/-	2/6
— superbus longicalycina	2/-	-/4
— — — alpestris , very rare choice species, 3 to 4 inches high, large deep pink flowers.....	15/-	2/-
— — — speciosus , fine fragrant pink flowers, 5 to 6 inches high	8/-	1/2

	per 10	each
— species new, dwarf species, fine purplish pink flowers, 3 to 4 inches high	3	4
— — <i>mandshurica</i> , 5 to 6 inches high, large lacinated pink flowers	2/6	
<i>Lychnis Miquelliana</i> , fascinating orange scarlet flowers.....	3/-	-/6
<i>Minuartia arctica</i> , dwarf creeping plant, covered with a wealth of tiny white flowers in Summer.....	8/-	1/2
<i>Krascheninikovia heterantha</i> , a tiny creeping species with many small white flowers	1/6	
<i>Silene Keiskei minor</i> , very beautiful alpine <i>Silene</i> with numerous flowers variable in colour according to plant.....	5/-	-/10
— — <i>Major</i> , an enlarged form of the above.....	5/-	-/10
— <i>repens</i> , tiny creeping plant, many white flowers.....	11/-	1/6
<i>Stellaria ruscifolia</i> , tiny alpine species, many white flowers	11/-	1/6

Polygonaceae : —

<i>Polygonum Reynoutria colorans nana</i> , dwarf form with ornamental leaves and red spikes, only 3-5 inches high.....	5/-	-/10
— <i>tenuicaule</i> , very beautiful plant only 4 inches high with long pink spikes in early spring, very fine.....	4/-	-/8
— <i>Savatieri</i> , fine alpine species, long white spikes, 7-9 inches high	6/-	-/11

Aristolochiaceae : —

<i>Asarum asarioides</i> , fine ground cover with Cyclamen-like silvery variegated dark green thick leathery leaves, every plant having a different variegation upon the leaves.....	5/-	-/10
— <i>Blumei</i> , species having similar description as the above. Some form has plain green leaves without variegation.....	5/-	-/10

Saururaceae : —

<i>Houttuynia cordata</i>	33/-	per 1000,	4/-	per 100,	-/8	—
— — <i>flore pleno</i>	—					1/6
— — <i>folis variegata</i>	—					1/6

Orchidaceae : —

<i>Angraecum falcatum</i> , an unbelievably hardy epiphytic species, well worth trying at the warmest part of England. Very fragrant white flowers in July. A very indispensable beautiful plant for beautifying old trunks by growing attached to them	4/-	-/8
<i>Bletilla striata</i> , well known terrestrial orchid with fine purple flowers, very easy to grow.....	1/6	-/4
— <i>Gebina</i> , white coloured form of the above, equally beautiful	1/6	-/4
<i>Calanthe alpina</i> , beautiful perfectly hardy species even in the colder part of Japan with beautiful purple spikes, very easy to grow	10/-	1/5
— <i>discolor</i> . This species distributes even up to Hokkaido and therefore must be equally hardy as the above.....	2/-	-/4
— — <i>flore purpurea</i>	10/-	1/5
— — <i>odora</i> , a form having a fragrance recalling that of Lily of the Valley.....	10/-	1/5
— <i>nipponica</i> , another very hardy species with large greenish yellow flowers in tall spike in March or April.....	15/-	2/-
— <i>tricornata</i> , very hardy species with brownish yellow flowers	15/-	2/-
— <i>kirishimensis</i> , beautiful species having a long spike of many flowers, sepals and petals being all white.....	10/-	1/5
— <i>striata Sieboldii</i> , a really magnificent species unbelievably hardy, with large uniform golden yellow flowers more than 2 inches across which are borne in a long spike in spring. Should be in every collection. Very easy to grow	12/6	1/8
— — — <i>magnifica</i> , most beautiful large golden yellow flowers	8/-	
— — — <i>elegantissima</i> , very decorative form with flowers in an extremely well formed truss, which are highly and delicately fragrant, petals and sepals being golden yellow uniformly and lips pure white.....	—	8/-
<i>Calypso speciosa</i> , fine species said to have larger and deeper coloured flowers than <i>C. bulbosa</i>	15/-	2/-

	per 10	each
<i>Cephalanthera erecta</i> , shade loving orchid with white flowers		45
.....	4/-	-/8
— <i>falcata</i> , shade loving orchid with golden yellow flowers...	4/-	-/8
<i>Cypripedium debile</i> , greenish yellow flowers with a purple tinge		
.....	3/-	-/6
— <i>japonicum</i> , beautiful leaves and flowers.....	2/-	-/4
— <i>guttatum</i> , rare species from Korea with cream flowers...	20/-	2/6
— <i>Yatabeanum</i> , very rare species with yellow flowers.....	6/6	1/-
— <i>speciosum</i> , common but beautiful species with pink flowers		
.....	3/-	-/6
— — <i>albiflorum</i>	—	3/-
— species near to <i>C. speciosum</i> , very rare species from Hokkaido with white large flowers	—	4/-
— — <i>Mandshurica</i> , magnificent species said to be much larger than <i>C. speciosum</i> in flower, leaf and height.....	—	2/6
<i>Dactylostelixa maculosa</i> , dainty species with white purple-spotted flowers	4/-	-/8
<i>Dendrobium monile</i> , beautiful epiphytic orchid with flowers of varied shades of white to pink and to soft purple. Unbelievably hardy and well worth trying at the warmer part of England	3/-	-/6
<i>Ephippianthus Schmidtil</i> , dainty alpine species with white flowers	5/-	-/10
<i>Goodyera macrantha</i> , very beautiful terrestrial orchid with large salmon pink flowers, very rare but very fine.....	—	2/6
— <i>Maximowicziana</i> , another fine species with pale purple flowers	7/-	1/1
— <i>pendula</i> , epiphytic species with white fragrant flowers...	7/-	1/1
— <i>velutina</i> , rare species with white pink-tinted flowers.....	—	3/-
— <i>Schlechtendalliana</i> , very hardy species with beautiful silvery-variegated leaves and salmon-tinted white flowers...	3/-	-/6
— <i>repens</i> , like a small form of the above.....	4/-	-/8
<i>Gymnadenia Chidori</i> , very rare but probably the finest hardy orchid of tiny growth.....	26/-	2/6
— <i>conopsea</i> , purple red spikes 1-1½ feet high.....	5/-	-/10
— <i>eucullata</i> , dainty species with purple red spikes in summer	4/-	-/8
— <i>cyclochila</i> , beautiful rare species with pink flowers, one or two upon a stem.....	4/-	-/8
— <i>Keiskei</i> , one of the finest species with pale purple flowers, 4 to 5 inches high.....	4/-	-/8
— <i>Kinoshitai</i> , species resembling the above with white pink-tinted flowers	5/-	-/10
<i>Arethusa japonica</i> , fine species with purple red flowers for a boggy place	10/-	1/5
<i>Habenaria geniculata</i> , autumn flowering species with beautiful white flowers.....	4/-	-/8
— <i>radiata</i> , very fine species with large white flowers, for a boggy place.....	2/-	-/4
<i>Liparis liliifolia</i> , one of the finest species with pale purple red spikes 6 to 12 inches high.....	10/-	1/5
— <i>nervosa</i> , interesting species with small black flowers.....	10/-	1/5
<i>Orchis aristata</i> , one of the finest orchid in Japan with pink spikes, 10-18 inches high.....	12/6	1/8
— <i>chondradenia</i> , loose spikes of pure white flowers.....	8/-	1/2
— <i>rupestris</i> , one of the finest tiny species with purple red spikes	2/-	-/4
<i>Pagonia japonica</i> , fine tiny species with solitary pink flowers for a boggy place	2/-	-/4
— — <i>minor</i>	2/-	-/4
<i>Spiranthes spiralis</i> , very easily grownable beautiful orchid with purple red spikes 1-1½ feet high. Very fine orchid for naturalizing. Likes a sunny place.....	120/- per 1000, 16/- per 100,	2/- -/4

	per 100	
<i>Narcissus Tazetta chinensis</i> . Extra strong bulbs.....	7/-	1/- —
<i>Lycoris albiflora</i> . Extra strong bulbs.....	33/-	4/- -/6

		per 10	each
— <i>aurea</i> . Extra extra strong bulbs.....	23/-	3/-	-/6
— <i>sanguinea</i> . Extra extra strong bulbs.....	9/-	-/6	—
— <i>squamigera</i> . Extra extra strong bulbs.....	23/-	3/-	-/6
— <i>radiata</i> . Extra extra strong bulbs.....	7/-	1/-	—

Liliaceae : —

<i>Alectrororus yedoensis</i> , beautiful rock plant with white pyramidal shaped spikes.....	10/-	1/5	
— <i>platypetalus</i> , rare form with rose pyramidal shaped spikes, hailing from the Island of Yakushima.....	—	2/-	
<i>Allium strictum</i> , dainty tiny species with purple red flowers.....	5/-	-/10	
<i>Asparagus pygmaeus</i> , very hardy species of dwarf compact habit only 5 to 6 inches high. Very fine for rockery.....	3/-	-/6	
<i>Chinographis japonica</i> , long pure white spikes in summer, very fine	4/-	-/8	
<i>Clintonia udensis</i> , white spikes upon the setting of broad green leaves, true alpine species.....	3/-	-/6	
<i>Convallaria majaris japonica</i>	30/- per 1000, 4/- per 100,	-/8	—
<i>Disporum sessile</i> , shade loving plant with pendant white flowers tubular campanulad in shape.....	3/-	-/6	
— <i>smilacinum</i> , shade loving plant with pendant cream white flowers tubular campanulated in shape.....	3/-	-/6	
<i>Erythronium japonicum</i> , handsome mottled leaves and purple coloured flowers, very fine.....	10/- per 100,	1/6	—
<i>Fritillaria camtschatcensis</i> , purplish black flowers. <i>Flowering size bulbs</i>	2/10	-/5	
<i>Extra strong bulbs</i>	4/8	-/9	
— <i>Thunbergii</i> , widely campanulated cream flowers in early spring. <i>Strong bulbs</i>	1/10	-/3	
<i>Extra strong bulbs</i>	2/6	-/5	
<i>Helonoipsis japonica</i> , white spikes upon the fleshy green setting of leaves	5/-	-/10	
— <i>orientalis</i> , purple red spikes.....	3/-	-/6	
<i>Hemerocallis aurantiaca</i> , fragrant yellow flowers.....	4/-	-/8	
— <i>disticha</i> , orange yellow flowers in summer.....	5/-	-/10	
— <i>Dumortierii</i> , fragrant sulphure yellow flowers.....	4/-	-/8	
— <i>esculenta</i> , pale orange yellow flowers.....	5/-	-/10	
— <i>fulva kwanso</i> , double orange yellow flowers.....	4/-	-/8	
— <i>Middendorfil</i> , fragrant sulphure yellow flowers.....	5/-	-/10	
— <i>minor</i> , fragrant pale yellow flowers.....	4/-	-/8	
<i>Hosta japonica angustifolia</i> , small narrow leaved form with pale purple flowers.....	2/-	-/4	
— <i>Sieboldiana longipes</i>	3/-	-/6	
— <i>japonica coerulea</i> , blue coloured form.....	2/-	-/4	
<i>Liliums</i> . See my special offer of Lily bulbs.			
<i>Liriope graminifolia</i> , easily grown evergreen plant with long purple spikes followed by blue black berries.....	1/6	-/3	
<i>Ophiopogon planiscapus leucanthus</i> , beautiful white spikes...3/-		-/6	
<i>Paris japonica</i> , very gorgeous woodland plant about 2-3 ft. high with enormous leaves one foot in length spreading like an umbrella about 2 feet across. The flowers are large and pure white. Very rarely found.....	20/-	2/6	
<i>Polygonatum falcatum</i> , nodding white <i>Lapazeria</i> -like flowers.....	3/-	-/6	
— <i>japonicum</i> , resembles the above.....	3/-	-/6	
— <i>lasianthum</i> , very minute species.....	4/-	-/8	
<i>Reineckia carnea</i> , strong ground cover with pale purple spikes	3/-	-/8	
<i>Scilla Thunbergii</i> , purple spikes in summer...8/- per 100,	1/-	—	
<i>Smilacina japonica</i> , loose panicles of white flowers followed by bright scarlet berries, very fine.....	5/-	-/10	
<i>Streptopus japonicum</i> , pendant cream flowers followed by red berries	5/-	-/10	
<i>Tricyrtis flava</i> , very dwarf species only 1-2 inches high with large yellow campanulated flowers.....	8/-	1/2	
— <i>formosana</i> , beautiful species with large panicles of dark purple red flowers.....	5/-	-/10	
— <i>stolonifera</i> , variety form of <i>Tricyrtis formosana</i> with some horticultural difference, equally beautiful.....	5/-	-/10	
— <i>hirta</i> , a most common species with a beautiful floral display in autumn	2/-	-/4	
— <i>japonica</i> , species resembling <i>T. hirta</i>	3/-	-/6	

		47
	per 10	each
— <i>albida</i> , pure white spotless flowering form, very choice	4/-	-/8
— <i>latifolia</i> , very choice species with yellow purple-spotted flowers	16/-	2/1
— <i>macrantha</i> , the finest <i>Tricyrtis</i> in Japan with large tubular campanulated sulphure yellow pendant flowers in autumn, very fine and very choice	20/-	2/6
— <i>macrospoda</i> , species resembling <i>T. hirta</i> but with more profusely purple spotted flowers	4/-	-/8
— <i>ohsuminensis</i> , rare species with large yellow spotless flowers and grossy foliage, equally best as <i>Tricyrtis macranthum</i>	20/-	2/6
— <i>yatabeana</i> , deep golden yellow spotless flowers, very fine	20/-	2/6
— species, highly fragrant white purple spotted flowers	5/-	-/10
— <i>hybrid mixture</i> , mixture of various hybrids between <i>T. formosana</i> and <i>T. hirta</i>	5/-	-/10
— — “ <i>Hekiun</i> ”, beautiful hybrid selected from the hybrids between <i>T. formosana</i> and <i>T. hirta</i> , large panicles of bluish pink flowers, very fine	20/-	2/6
— — “ <i>Toun</i> ”, another beautiful hybrid selected from the same crossing, warm pink flowers in large panicles	20/-	2/6
<i>Trillium apetalon</i> , reddish purple flowers	3/-	-/6
— <i>Tshonoskii</i> , white flowers	3/-	-/6
— <i>Kamtschaticum</i> , the finest <i>Trillium</i> in Japan, large white flowers	5/-	-/10
